Executive Summary

Glossary

Section 01 Introduction

1.1	The Project	1-1
1.2	Existing Mine Complex	1-4
1.3	The Proponent.....	1-4
1.4	Project Outline	1-5
1.5	Project Rationale	1-7
1.6	Relationship to Other Projects.....	1-7
1.6.1	Goonyella, Riverside and Broadmeadow Mines	1-7
1.6.2	Coal Export Terminals.....	1-8
1.7	Nearby Coal Mines and Projects.....	1-8
1.7.1	Grosvenor Coal Mine Project	1-8
1.7.2	North Goonyella and Eaglefield Expansion Project	1-8
1.7.3	Integrated Isaac Plains Project.....	1-9
1.7.4	Moranbah South Project.....	1-9
1.8	The Environmental Impact Assessment Process.....	1-9
1.8.1	Commonwealth Government Process	1-9
1.8.2	Queensland Government Process	1-10
1.9	EIS Objectives	1-11
1.10	EIS Methodology	1-14
1.11	EIS Structure	1-14
1.12	Public Consultation Process and Submissions	1-19
1.12.1	EIS Consultation.....	1-19
1.12.2	Further Information about the Project and EIS.....	1-20
1.12.3	Making an EIS Submission	1-20
1.12.4	Ongoing Consultation and Social Monitoring	1-21
1.13	Project Approvals	1-21
1.13.1	Overview of Relevant Legislation and Policy Requirements.....	1-21
1.13.2	Commonwealth Legislative and Policy Requirements	1-24
1.13.2.1	Environment Protection and Biodiversity Conservation Act 1999	1-24
1.13.2.2	Native Title Act 1993.....	1-24
1.13.3	Queensland Legislative Requirements	1-25
1.13.3.1	State Development and Public Works Organisation Act 1971	1-25
1.13.3.2	Environmental Protection Act 1994	1-26
1.13.3.3	Mineral Resources Act 1989.....	1-29

1.13.3.4	Sustainable Planning Act 2009.....	1-30
1.13.3.5	Nature Conservation Act 1992.....	1-30
1.13.3.6	Water Act 2000	1-30
1.13.3.7	Aboriginal Cultural Heritage Act 2003	1-31
1.13.3.8	Queensland Heritage Act 1992.....	1-31
1.13.3.9	Transport Infrastructure Act 1994	1-32
1.13.3.10	Strategic Cropping Land Act 2011	1-32
1.13.3.11	Petroleum and Gas (Production and Safety) Act 2004	1-32
1.13.3.12	Vegetation Management Act 1999	1-33
1.13.3.13	Explosives Act 1999	1-33
1.13.3.14	Fire and Rescue Service Act 1990	1-33
1.13.3.15	Other legislation	1-34
1.13.4	Planning and Social Policy Framework.....	1-34
1.13.4.1	State Planning Policies (SPP)	1-34
1.13.4.2	Social Impact Assessment Guideline (SDIP 2013)	1-35
1.13.4.3	Local Industry Policy: A Fair Go for Local Industry.....	1-36
1.13.4.4	Work for Queensland: Resources Skills and Employment Plan.....	1-36
1.13.4.5	Toward Q2: Tomorrow's Queensland.....	1-37
1.13.4.6	Solid Partners Solid Futures Plan 2013-2016	1-38
1.13.4.7	Regional Plans and Strategies	1-38
1.13.4.8	Local Council Planning Schemes	1-39
1.13.4.9	The Isaac Region 2020 Vision.....	1-40

Section 02 Project Rationale and Alternatives

2.1	Project Rationale	2-1
2.1.1	Project Need.....	2-1
2.1.2	Technical Feasibility and Commercial Viability	2-2
2.1.2.1	BHP Billiton Project Development and Assessment Process	2-2
2.1.3	Compatibility with Policy and Regulatory Frameworks	2-4
2.1.4	Economic, Social and Environmental Costs and Benefits	2-4
2.1.5	Regional Socio-Economic Issues.....	2-4
2.1.6	Demands on Natural Resources	2-5
2.1.7	Demands on Community Services and Facilities.....	2-5
2.2	Project Alternatives	2-6
2.2.1	No Project.....	2-6
2.2.2	Alternative Locations	2-6
2.2.3	Mining Methods	2-6
2.2.4	Coal Clearance and Handling System	2-7
2.2.5	Coal Handling and Preparation Plant.....	2-7
2.2.6	Rejects and Tailings	2-8
2.2.7	Site Water Management.....	2-8
2.2.8	Water Supply	2-8
2.2.9	Accommodation and Workforce Arrangements	2-9
2.2.10	Power Supply	2-9
2.2.11	Rail and Port.....	2-9

2.3	Ecologically Sustainable Development	2-11
2.3.1	Definition of Sustainability	2-11
2.3.2	Project Sustainability Principles	2-11
2.3.3	Ecologically Sustainable Development Principles.....	2-12

Section 03 Project Description

3.1	Overview of the Proposed Project.....	3-1
3.1.1	Introduction.....	3-1
3.1.2	Project Components.....	3-2
3.2	Project Timing.....	3-4
3.3	Mining Tenure.....	3-5
3.4	Mineral Resources	3-13
3.4.1	Coal Resource Estimate.....	3-13
3.4.2	Proposed Red Hill Mine Production	3-13
3.4.3	Ongoing Evaluation and Exploration Activities.....	3-14
3.5	Overview of the Current GRB Mine Complex	3-15
3.6	Proposed Underground Mining Operations.....	3-15
3.6.1	Overview.....	3-15
3.6.2	Mine Access	3-16
3.6.3	Proposed Mining Methodology.....	3-16
3.6.4	Groundwater Inflow	3-20
3.6.5	Predicted Subsidence	3-20
3.6.6	Ventilation.....	3-21
3.7	Surface Infrastructure and Facilities.....	3-23
3.7.1	Mine Industrial Area	3-23
3.7.2	Internal Roads	3-25
3.7.3	Raw Coal Stockpiles and Handling	3-25
3.7.4	Conveyors	3-26
3.7.5	Red Hill CHPP	3-26
3.7.5.1	Overview	3-26
3.7.5.2	Process	3-29
3.7.5.3	Red Hill CHPP Waste Management.....	3-29
3.7.5.4	Red Hill CHPP Water Management.....	3-30
3.7.5.5	Surface Water Management.....	3-30
3.7.5.6	Fire Protection System	3-30
3.7.6	Product Stockpiles and Train Load-out	3-31
3.7.7	Power	3-31
3.7.8	Eungella Pipeline.....	3-32
3.7.9	Accommodation Village.....	3-32
3.8	Incidental Mine Gas Management	3-32
3.8.1	Introduction.....	3-32
3.8.2	Pre-drainage of IMG.....	3-33

3.8.2.1	Gas Extraction Wells	3-33
3.8.2.2	Management of Water	3-36
3.8.2.3	Management of Incidental Mine Gas	3-37
3.8.2.4	Flares	3-38
3.8.3	Ventilation Air Methane	3-38
3.8.4	Goaf Methane Management.....	3-38
3.8.5	Gas Extraction Infrastructure Development and Management	3-39
3.8.5.1	Introduction	3-39
3.8.5.2	Well Location and Construction	3-39
3.8.5.3	Linear IMG Infrastructure.....	3-40
3.8.5.4	Maintenance and Management of Gas Infrastructure	3-42
3.8.5.5	Decommissioning	3-43
3.9	Water Management.....	3-43
3.9.1	System Overview	3-43
3.9.2	Project Water Requirements	3-44
3.9.3	Raw Water Supply Infrastructure and Water Allocations	3-44
3.9.4	Proposed Water Production	3-45
3.9.5	Water Storage and Infrastructure Design and Management	3-45
3.10	Transportation	3-46
3.10.1	Road Transport	3-46
3.10.2	Rail and Port.....	3-47
3.10.3	Shipping.....	3-47
3.10.4	Air Traffic	3-47
3.11	Waste Generation and Management	3-48
3.11.1	Mining and Coal Processing Wastes	3-48
3.11.2	Industrial and Amenities Wastes.....	3-48
3.11.3	Air Emissions.....	3-48
3.11.4	Sewage.....	3-49
3.12	Workforce and Employment	3-49
3.12.1	Construction	3-49
3.12.2	Operations.....	3-51
3.13	Construction	3-52
3.13.1	Overview.....	3-52
3.13.2	Site Access and Temporary Laydown Area and Facilities.....	3-52
3.13.3	Site Preparation.....	3-53
3.13.4	Construction Utilities.....	3-54
3.13.5	Earthworks.....	3-54
3.13.6	Concrete and Asphalt Batching.....	3-55
3.13.7	Quarry Material Requirements	3-55
3.13.8	Levee Construction	3-55
3.13.9	Road Works and Bridge	3-56
3.13.10	Accommodation Village.....	3-57
3.13.11	MIA and Raw Coal Stockpiles and Handling Area.....	3-57

3.13.12 Red Hill CHPP, Conveyors and Product Stockpiles.....	3-58
3.13.13 Construction Waste Management.....	3-58
3.13.14 Contractor Demobilisation.....	3-59
3.13.15 Construction Equipment.....	3-59
3.14 Rehabilitation and Decommissioning.....	3-59

Section 04 Climate, Natural Hazards & Climate Change

4.1 Climate.....	4-1
4.2 Rainfall Patterns.....	4-1
4.3 Air Temperature.....	4-2
4.4 Humidity.....	4-2
4.5 Wind.....	4-3
4.6 Stability Class.....	4-4
4.7 Mixing Heights.....	4-6
4.8 Temperature Inversions.....	4-7
4.9 Extremes of Climate.....	4-7
4.9.1 Drought.....	4-7
4.9.2 Flood.....	4-9
4.9.3 Storm Events.....	4-10
4.9.4 Rainfall Extremes.....	4-10
4.9.5 Bushfires.....	4-14
4.10 Climate Change.....	4-14
4.10.1 Summary of Predicted Impacts.....	4-14
4.10.2 Risk Assessment Methodology.....	4-16
4.10.3 Results.....	4-17
4.10.4 Risk Management Measures.....	4-18

Section 05 Land Resources

5.1 Land Use.....	5-1
5.1.1 Introduction.....	5-1
5.1.1.1 Purpose.....	5-1
5.1.1.2 Methodology.....	5-1
5.1.2 Description of Environmental Values.....	5-2
5.1.2.1 Location.....	5-2
5.1.2.2 Administrative Framework.....	5-5
5.1.2.3 Land Use Context.....	5-5
5.1.2.4 Existing Land Uses and Land Tenure.....	5-5
5.1.3 Land Tenure and Ownership.....	5-6
5.1.3.1 Underlying Land Tenure.....	5-6
5.1.3.2 Mining and Petroleum Tenements.....	5-6
5.1.3.3 Special Interest and Protected Areas.....	5-7

5.1.3.4	Native Title	5-13
5.1.4	Existing Land Uses.....	5-15
5.1.4.1	Biophysical.....	5-15
5.1.4.2	Mining and Resource Extraction.....	5-16
5.1.4.3	Agricultural Activities.....	5-16
5.1.4.4	Residential and Urban Land Uses	5-18
5.1.5	Utilities and Services	5-19
5.1.5.1	Power	5-21
5.1.5.2	Water Pipelines and Dams	5-21
5.1.5.3	Gas Pipelines.....	5-21
5.1.6	Transport Infrastructure.....	5-22
5.1.6.1	Roads.....	5-22
5.1.6.2	Stock Routes.....	5-22
5.1.6.3	Railways.....	5-23
5.1.7	Statutory Land Use Planning.....	5-23
5.1.7.1	Sustainable Planning Act 2009.....	5-23
5.1.7.2	State Planning Regulatory Provisions	5-24
5.1.7.3	State Planning Policies	5-24
5.1.7.4	Coal Plan 2030	5-27
5.1.7.5	Regional Planning Instruments.....	5-28
5.1.7.6	Local Planning Instruments	5-36
5.1.8	Land Use Impacts and Mitigation Methods	5-38
5.1.8.1	Biophysical Impacts and Mitigation Methods.....	5-38
5.1.8.2	Mining and Resource Extraction Impacts and Mitigation Methods.....	5-38
5.1.8.3	Impacts on Agricultural Land Use and Values.....	5-40
5.1.8.4	Impacts on Residential and Other Sensitive Land Uses	5-41
5.1.8.5	Urban Development Impacts and Mitigation Methods.....	5-41
5.1.9	Utilities and Services Impacts and Mitigation Methods	5-42
5.1.9.1	Power Impacts and Mitigation Methods.....	5-42
5.1.9.2	Water Pipelines and Dams Impacts and Mitigation Methods	5-42
5.1.9.3	Gas Pipelines Impacts and Mitigation Methods.....	5-42
5.1.10	Transport Infrastructure Impacts and Mitigation Methods.....	5-43
5.1.10.1	Roads.....	5-43
5.1.10.2	Stock Routes.....	5-43
5.1.10.3	Railways.....	5-43
5.2	Scenic Amenity and Lighting.....	5-44
5.2.1	Description of Environmental Values	5-44
5.2.1.1	Introduction	5-44
5.2.1.2	Regional Landscape Context.....	5-44
5.2.1.3	Local Landscape Context	5-46
5.2.1.4	Landscape Character Zones	5-48
5.2.1.5	Landscape Scenic Quality	5-56
5.2.1.6	Landscape Significance of the EIS Study Area.....	5-58
5.2.1.7	View Situations Descriptions	5-59
5.2.1.8	View Situations Assessment - Roads.....	5-59

5.2.1.9	View Situation Assessment – Homesteads	5-69
5.2.2	Potential Impacts from Proposed Project.....	5-71
5.2.2.1	Visual Components of Proposed Project.....	5-71
5.2.2.2	Assessment Methodology.....	5-73
5.2.2.3	Visibility (Viewshed) Assessment	5-74
5.2.2.4	Visual Impact Assessment Criteria	5-75
5.2.2.5	Visual Impact Assessment – Viewer Locations	5-77
5.2.2.6	Visual Impact Assessment – Above Ground Components.....	5-83
5.2.2.7	Rehabilitation and Closure.....	5-91
5.2.3	Recommendations and Mitigation Commitments.....	5-91
5.2.4	Conclusion.....	5-92
5.3	Topography, Geology and Soils	5-93
5.3.1	Topography	5-93
5.3.2	Geology	5-94
5.3.2.1	Mining and Petroleum Tenure	5-94
5.3.2.2	Regional Geological Setting	5-94
5.3.2.3	Project Specific Geological Setting.....	5-94
5.3.2.4	Geological Factors Relevant to Resource Utilisation	5-104
5.3.2.5	Geochemical Information for the Area to be Mined	5-107
5.3.2.6	Potential Impacts and Mitigation Measures.....	5-108
5.3.3	Soils and Land Suitability	5-112
5.3.3.1	EIS Study Area	5-112
5.3.3.2	Study Objectives	5-113
5.3.3.3	Description of Environmental Values.....	5-115
5.3.3.4	Potential Impacts and Mitigation Measures.....	5-137
5.4	Land Contamination	5-148
5.4.1	Description of Environmental Values	5-148
5.4.1.1	Overview	5-148
5.4.1.2	Summary of Results	5-148
5.4.2	Potential Impacts and Mitigation Measures	5-149
5.4.2.1	Overview	5-149
5.4.2.2	Disturbance of Existing Contaminated Soils.....	5-151
5.4.2.3	Contamination of Soils.....	5-152
5.5	Rehabilitation and Decommissioning	5-154
5.5.1	Rehabilitation Objectives.....	5-155
5.5.2	Post-Mining Land Use Concept	5-156
5.5.3	Land Suitability Pre and Post-Mining	5-156
5.5.4	Rehabilitation Strategy	5-158
5.5.4.1	Current Rehabilitation at Goonyella Riverside and Broadmeadow Mine Complex	5-158
5.5.4.2	Landform Design and Planning	5-158
5.5.5	Success Criteria	5-163
5.5.6	Rehabilitation Methods.....	5-169
5.5.6.1	Surface Facilities and Infrastructure	5-169

5.5.6.2	Subsided Areas.....	5-172
5.5.6.3	Soil Management.....	5-176
5.5.6.4	Revegetation.....	5-177
5.5.6.5	Weed and Pest Management	5-181
5.5.6.6	Contaminated Land	5-182
5.5.6.7	Progressive Rehabilitation	5-183
5.5.7	Monitoring.....	5-183
5.5.8	Maintenance.....	5-185
5.5.9	Post Closure and Monitoring.....	5-185

Section 06 Mineral Waste

6.1	Introduction.....	6-1
6.2	Description of Environmental Values	6-1
6.2.1	Summary of Geology.....	6-2
6.2.2	Mineral Waste Quantities	6-6
6.2.3	Mineral Waste Disposal.....	6-7
6.2.3.1	Spoil Disposal	6-7
6.2.3.2	Reject Disposal.....	6-7
6.3	Geochemical Nature of Mineral Waste Materials.....	6-10
6.3.1	Acid Generating Potential.....	6-10
6.3.2	Multi-element Composition and Water Quality.....	6-11
6.4	Use of Overburden Materials for Revegetation/Rehabilitation	6-12
6.5	Potential Impacts and Management Measures.....	6-13
6.5.1	Waste Disposal Methodology.....	6-13
6.5.2	On-going Geochemical Sampling and Analysis.....	6-14
6.5.3	Water Quality Monitoring and Management.....	6-15

Section 07 Surface Water

7.1	Introduction.....	7-1
7.2	Description of Environmental Values and Baseline Conditions	7-3
7.2.1	Environmental Values	7-3
7.2.1.1	Surface Water Context of the Project.....	7-3
7.2.1.2	Legislative and Policy Framework	7-3
7.2.2	Surface Water Resources	7-8
7.2.2.1	Catchment Context.....	7-8
7.2.2.2	Watercourses.....	7-8
7.2.2.3	Existing Water Users	7-9
7.2.2.4	Land Use.....	7-9
7.2.2.5	Climate.....	7-9
7.2.2.6	Hydrology.....	7-9
7.2.3	Mine Water Management	7-12
7.2.3.1	Project Context	7-12
7.2.3.2	Mine Water Definition	7-14

7.2.3.3	Baseline Water Management Scenario	7-14
7.2.3.4	Existing GRB Mine Environmental Authority Discharge Criteria	7-15
7.2.3.5	Mine Water Reuse and Baseline Water Demands	7-15
7.2.3.6	Dominant Mine Water Sources, Catchments, and Typical Salinity	7-16
7.2.3.7	Mine Dewatering Operations	7-16
7.2.3.8	Overview Description of the GRB Mine Water Balance Model	7-17
7.2.3.9	Baseline GRB Mine Water Management System Performance	7-18
7.2.4	Baseline Flooding Assessment	7-19
7.2.4.1	Flood Hydrology	7-19
7.2.4.2	Flood Hydraulics	7-21
7.2.4.3	Baseline Flood Hydraulic Model Results	7-21
7.2.5	Existing Geomorphology Characterisation	7-25
7.2.5.1	Isaac River	7-25
7.2.5.2	Goonyella Creek	7-26
7.2.5.3	12 Mile Gully	7-29
7.2.5.4	Minor Tributaries and Flow Paths	7-29
7.2.6	Existing Water Quality	7-29
7.2.6.1	Environmental Values	7-30
7.2.6.2	Water Quality Objectives and Guidelines	7-31
7.2.6.3	Existing Water Quality	7-32
7.3	Potential Impacts and Mitigation Measures	7-35
7.3.1	Construction Phase	7-35
7.3.2	Operational Phase Project Case Mine Water Management	7-38
7.3.2.1	Overview and Organisational Responsibilities	7-38
7.3.2.2	Mine Waters Generated by RHM	7-38
7.3.2.3	Project Water Requirements	7-39
7.3.2.4	Project Case Water Management Assessment Modelling	7-39
7.3.2.5	Project Case Mine Water Management Impact Summary	7-40
7.3.3	Flood Assessment	7-41
7.3.3.1	Structures in Flood Plain and Context for Project Case Assessment	7-41
7.3.3.2	Project Case Flood Hydraulic Model Results	7-42
7.3.3.3	Subsidence of the Project Flood Protection Levee	7-43
7.3.4	Operational Phase Water Quality Impacts	7-48
7.3.4.1	Mine Water Management	7-48
7.3.4.2	Subsidence Impacts on Water Quality	7-50
7.3.4.3	Incidental Mine Gas Management Water Quality Impacts	7-51
7.3.4.4	Other Impacts	7-52
7.3.4.5	Water Quality Monitoring Program	7-53
7.3.5	Impacts of Subsidence on River Geomorphology	7-55
7.3.5.1	Impacts on Stream Geomorphology	7-55
7.3.5.2	Impacts on Tributaries and Minor Flow Paths	7-64
7.3.5.3	Monitoring and Management	7-67
7.3.6	Post Mine Phase Impacts on Water Resources Hydrology	7-68
7.3.6.1	Overview	7-68

7.3.6.2	Mitigation of Potential Water Losses in Percolation through Surface Cracking.....	7-68
7.3.6.3	Evaporation from Water Ponding in Surface Subsidence Depressions .	7-69
7.3.6.4	Extent of Surface Subsidence Voids Outside the Isaac River Channel .	7-70
7.3.6.5	12 Mile Gully Hydrological Analysis - Case with No Mitigation	7-72
7.3.6.6	Significance of Hydrological Impacts - Case with No Mitigation.....	7-72
7.3.6.7	12 Mile Gully Hydrological Analysis - Case with Potential Mitigation	7-73
7.3.7	Consideration of Climate Change Impacts on Flooding.....	7-76

Section 08 Groundwater

8.1	Description of Environmental Values	8-3
8.1.1	Legislative Framework and Requirements.....	8-3
8.1.2	Geology and Groundwater Occurrence	8-3
8.1.2.1	Geological Overview	8-3
8.1.2.2	Groundwater Occurrence	8-4
8.1.2.3	Quaternary Alluvial Aquifers	8-5
8.1.2.4	Tertiary Sediment Aquifers	8-6
8.1.2.5	Tertiary Basalt Aquifers	8-6
8.1.2.6	Permian-Triassic Strata Aquifers	8-9
8.1.3	Groundwater Levels and Flows.....	8-12
8.1.3.1	Quaternary Alluvial Aquifers	8-12
8.1.3.2	Tertiary Sediment Aquifers	8-12
8.1.3.3	Tertiary Basalt Aquifers	8-13
8.1.3.4	Permian-Triassic Strata Aquifers	8-13
8.1.4	Groundwater Use	8-14
8.1.5	Groundwater Quality	8-17
8.1.6	Assessment of Environmental Values.....	8-18
8.1.6.1	Biological Integrity of a Pristine or Modified Aquatic Ecosystem.....	8-18
8.1.6.2	Suitability for Recreational Use (Primary Recreation)	8-21
8.1.6.3	Suitability for Minimal Treatment before Supply as Drinking Water (Raw Water).....	8-21
8.1.6.4	Suitability for Primary Industry Use.....	8-22
8.1.6.5	Maintenance of Cultural and Spiritual Values.....	8-22
8.2	Potential Impacts and Mitigation Measures	8-22
8.2.1	Approach	8-22
8.2.2	Potential Impacts during Development and Operation	8-23
8.2.2.1	Impacts on Regional Groundwater Levels.....	8-23
8.2.2.2	Additional Potential Impacts	8-30
8.2.3	Potential Impacts Post-Mining.....	8-30
8.2.3.1	Impacts on Regional Groundwater Levels.....	8-30
8.2.3.2	Impacts on Groundwater Quality	8-31
8.2.4	Mitigation Measures for Potential Impacts	8-31
8.2.4.1	Groundwater Monitoring Program	8-31
8.2.4.2	Impacts on Nearby Groundwater Users	8-33
8.2.4.3	Seepage from Stockpiles and Surface Water Control Structures	8-33

8.2.4.4	Hydrocarbon and Chemical Contamination	8-34
8.2.4.5	Installation of Gas Drainage Bores	8-34
8.2.4.6	Closure and Post-closure	8-34

Section 09 Terrestrial Ecology

9.1	Introduction	9-1
9.1.1	Aims	9-1
9.1.2	Overview of Studies Undertaken	9-2
9.1.3	Regional Setting	9-2
9.1.3.1	EIS Study Area	9-2
9.1.3.2	Bioregion	9-3
9.1.3.3	Sub-Region	9-3
9.1.4	Legislative Context	9-4
9.2	Assessment Methodology	9-4
9.2.1	Flora and Fauna Literature Review Methodology	9-4
9.2.1.1	Data Sources	9-4
9.2.1.2	Search Areas	9-5
9.2.1.3	Existing Ecological Reports	9-6
9.2.2	Flora Field Survey Methodology	9-7
9.2.2.1	Secondary Surveys	9-7
9.2.2.2	Tertiary Surveys	9-8
9.2.2.3	Quaternary Surveys	9-8
9.2.2.4	Targeted Grassland Survey	9-10
9.2.2.5	Specimen Identification	9-11
9.2.2.6	Nomenclature	9-11
9.2.2.7	Mapping Scale	9-12
9.2.2.8	Survey Limitations	9-12
9.2.3	Fauna Field Survey Methodology	9-12
9.2.3.1	Live Capture/Release Trapping	9-12
9.2.3.3	Daytime Bird Census	9-14
9.2.3.4	Spotlight Survey	9-14
9.2.3.5	Owl Call Playback	9-14
9.2.3.6	Microchiropteran Bat Call Detection	9-14
9.2.3.7	Active Searches	9-14
9.2.3.8	Incidental Observations	9-14
9.2.3.9	Nomenclature	9-14
9.3	Terrestrial Flora Results	9-15
9.3.1	Literature Review Results	9-15
9.3.1.1	Regional Ecosystems	9-15
9.3.1.2	Conservation Significant Species	9-15
9.3.1.3	Essential Habitat Mapping	9-16
9.3.1.4	Significant Biodiversity Values	9-17
9.3.2	Field Survey Results	9-17
9.3.2.1	Regional Connectivity	9-17

9.3.3.1	Species Diversity	9-20
9.3.3.2	Regional Ecosystems	9-20
9.3.3.3	Conservation Significant Vegetation Communities.....	9-21
9.3.3.4	Conservation Significant Flora Species	9-30
9.3.3.5	Targeted Grassland Survey.....	9-30
9.3.3.6	Riparian Communities	9-31
9.3.3.7	Weeds of Concern	9-31
9.4	Terrestrial Fauna Results	9-33
9.4.1	Literature Review	9-33
9.4.2	Field Survey Results	9-35
9.4.2.1	Fauna Diversity	9-35
9.4.2.2	Conservation Significant Fauna Species.....	9-37
9.4.2.3	Introduced Species	9-38
9.4.2.4	Habitat Values.....	9-38
9.4.2.5	Habitat Connectivity.....	9-42
9.4.2.6	Summary of Significant Values.....	9-42
9.5	Environmentally Sensitive Areas.....	9-43
9.5.1	Introduction.....	9-43
9.5.2	Approach	9-43
9.5.3	Description of Environmentally Sensitive Areas.....	9-43
9.5.3.1	Classification of Environmentally Sensitive Areas.....	9-43
9.5.3.2	Category A ESAs	9-43
9.5.3.3	Category C ESAs.....	9-50
9.5.3.4	Other Environmentally Sensitive Features	9-53
9.6	Potential Impacts on Flora and Fauna	9-56
9.6.1	Potential Impacts from Surface Facilities and Infrastructure.....	9-57
9.6.1.1	Flora and Vegetation Communities	9-57
9.6.1.2	Fauna.....	9-61
9.6.2	Potential Impacts from the Incidental Mine Gas Drainage Network.....	9-61
9.6.2.1	Overview	9-61
9.6.2.2	Flora and Vegetation Communities	9-62
9.6.2.3	Fauna.....	9-64
9.6.2.4	Summary.....	9-66
9.6.3	Potential Impacts from Underground Mining Operations at RHM and BRM.....	9-66
9.6.3.1	Overview	9-66
9.6.3.2	Flora and Vegetation Communities	9-67
9.6.3.3	Fauna.....	9-69
9.6.4	Related Impacts	9-70
9.6.4.1	Loss of Wildlife Corridors.....	9-70
9.6.4.2	Erosion and Soil Loss	9-72
9.6.4.3	Dust Impacts	9-72
9.6.4.4	Edge Effects.....	9-73
9.6.4.5	Noise and Light Impacts	9-74
9.6.4.6	Mortality or Injury	9-75

9.6.4.7	Pests and Feral Fauna	9-75
9.6.5	Potential Impacts on Conservation Significant Flora and Fauna	9-76
9.6.5.1	Flora and Vegetation Communities	9-76
9.6.5.2	Fauna.....	9-77
9.7	Potential Impacts on ESAs.....	9-82
9.7.1	Overview of Impacts.....	9-82
9.7.2	ESAs within the EIS Study Area	9-84
9.7.3	Great Barrier Reef Marine Park.....	9-84
9.7.4	Great Barrier Reef World Heritage Area	9-85
9.7.5	Referable Wetlands.....	9-86
9.7.6	Directory of Important Wetlands.....	9-86
9.8	Mitigation Measures, Monitoring and Offsets.....	9-86
9.8.1	Mitigation Measures for Flora and Fauna	9-87
9.8.1.1	Mitigation Measures Specific to Surface Facilities	9-87
9.8.1.2	Mitigation Measures Specific to the Gas Drainage Network	9-88
9.8.1.3	Mitigation Measures Specific to Mining of the RHM and BRM.....	9-90
9.8.1.4	Mitigation Measures Specific to Conservation Significant Fauna Species	9-90
9.8.1.5	Weed and Pest Management	9-91
9.8.1.6	Continued Vegetation Assessment	9-92
9.8.1.7	Rehabilitation of Disturbed Areas	9-92
9.8.2	Monitoring.....	9-93
9.8.2.1	Vegetation Monitoring.....	9-93
9.8.2.2	Vegetation Rehabilitation Monitoring.....	9-93
9.8.2.3	Weed and Pest Monitoring	9-94
9.8.2.4	Ornamental Snake Monitoring.....	9-94
9.8.3	Mitigation Measures for Environmentally Sensitive Areas	9-94
9.8.4	Offsets	9-95
9.8.4.1	Offset Strategy	9-95
9.8.4.2	Values Requiring Offsets	9-96
9.8.4.3	Offset Principles.....	9-97

Section 10 Aquatic Ecology

10.1	Evaluation of Aquatic Ecological Values	10-1
10.1.1	Introduction.....	10-1
10.1.2	Methodology	10-1
10.1.3	Field Surveys.....	10-2
10.1.4	Aquatic Habitat	10-4
10.1.4.1	Aquatic Habitat Assessment.....	10-5
10.1.5	Macroinvertebrates and Stream Health	10-6
10.1.6	Fish.....	10-8
10.1.7	Stygofauna	10-9
10.1.8	Other vertebrates	10-9
10.2	Potential Impacts and Mitigation Measures	10-9

10.2.1	Construction Earthworks and Clearance of Vegetation	10-10
10.2.2	Construction of Isaac River Crossings (Bridgeworks and Other Infrastructure) ...	10-11
10.2.3	Incidental Mine Gas Drainage Infrastructure.....	10-11
10.2.4	Spills and Leaks of Fuels and Chemicals	10-12
10.2.5	Subsidence.....	10-13
10.2.6	Monitoring.....	10-14
10.2.7	Residual Impacts.....	10-14
10.2.8	Decommissioning Phase.....	10-15

Section 11 Air Quality

11.1	Introduction.....	11-1
11.2	Pollutants Considered in the Assessment.....	11-4
11.3	Description of Environmental Values	11-4
11.3.1	Legislative Framework	11-4
11.3.1.1	National Guidelines.....	11-4
11.3.1.2	Queensland Legislation	11-5
11.3.2	Receptor Locations	11-6
11.3.3	Existing Air Quality Environment.....	11-7
11.3.3.1	Estimate of Background Levels	11-9
11.3.3.2	Contributions to the Air Quality Environment due to GRB Mine Complex.....	11-10
11.3.3.3	Existing Air Quality Environment	11-16
11.4	Potential Impacts.....	11-20
11.4.1	Sources of Air Emissions from the Project.....	11-20
11.4.1.1	Emission Sources during Construction.....	11-20
11.4.1.2	Emission Sources during Operation	11-20
11.4.2	Production Rates.....	11-21
11.4.3	Dust Reduction Measures	11-21
11.4.4	Emissions during Operation	11-21
11.4.5	Modelling Methodology and Emissions Scenarios.....	11-22
11.4.6	Dispersion Modelling Results	11-23
11.4.6.1	Red Hill Mine.....	11-23
11.4.6.2	Future Mining Scenario.....	11-24
11.5	Mitigation Measures and Management Strategies.....	11-27
11.5.1	Construction Phase	11-27
11.5.2	Operations Phase.....	11-27

Section 12 Greenhouse Gases

12.1	Description of Environmental Values	12-1
12.1.1	Introduction.....	12-1
12.1.2	Background to Greenhouse Gases and Climate Change.....	12-1
12.1.3	Legislative Framework	12-3
12.1.3.1	International Policy	12-3
12.1.3.2	Australia's Climate Change Policy.....	12-3
12.1.3.3	Clean Energy Act 2011	12-3
12.1.3.4	National Greenhouse and Energy Reporting Act 2007	12-3
12.1.3.5	Energy Efficiency Opportunities.....	12-4
12.1.3.6	State Policy and Initiatives.....	12-4
12.1.4	Inventory Methodology	12-5
12.1.4.1	Accounting and Reporting Principles.....	12-5
12.1.4.2	Inventory Organisational Boundaries	12-6
12.1.4.3	Inventory Operational Boundaries	12-6
12.1.4.4	Calculation Approach.....	12-7
12.1.4.5	Emission Factors	12-7
12.1.4.6	Materiality.....	12-8
12.1.4.7	Aggregation.....	12-8
12.1.5	Existing Greenhouse Gas Emission Sources	12-8
12.1.5.1	Goonyella Riverside Open-cut Mine.....	12-9
12.1.5.2	Broadmeadow Underground Mine.....	12-11
12.1.6	Summary of Greenhouse Gas Emissions from the GRB Mine Complex.....	12-13
12.1.7	Future Greenhouse Gas Emission Sources.....	12-14
12.1.7.1	Broadmeadow Underground Mine Extension.....	12-14
12.1.7.2	Red Hill Mine.....	12-14
12.1.8	Emissions Summary.....	12-18
12.1.9	Performance Measures	12-19
12.2	Potential Impacts and Mitigation Measures	12-19
12.2.1	Comparison to National Emissions	12-19
12.2.2	Beneficial Reuse of Gas.....	12-20
12.2.2.1	Option 1 – On Site Power Generation	12-20
12.2.2.2	Option 2 – Off-take to Third Party for Use Off Site	12-21
12.2.2.3	Option 3 – Transport and Storage of Incidental Mine Gas on the Mining Lease.....	12-21
12.2.2.4	Comparison of Greenhouse Gas Emissions Estimates for the Various Options	12-21
12.2.3	Other Greenhouse Gas Reduction Measures.....	12-22
12.2.3.1	Electrical Efficiency.....	12-23
12.2.3.2	Diesel Efficiency.....	12-23
12.2.3.3	Fugitive Emissions.....	12-23
12.2.3.4	Energy Efficiency Opportunities.....	12-23

Section 13 Noise and Vibration

13.1	Description of Environmental Values	13-1
13.1.1	Local Setting and Project Overview	13-1
13.1.1.1	Existing Receptor Locations	13-1
13.1.1.2	Proposed Development	13-3
13.1.1.3	Red Hill Accommodation Village.....	13-7
13.1.2	Existing Acoustic Environment.....	13-8
13.1.2.1	Unattended Background Noise Surveys.....	13-8
13.1.2.2	Operator-attended Noise Surveys	13-10
13.1.2.3	Vibration Survey.....	13-12
13.1.3	Construction Noise Criteria	13-13
13.1.3.1	Independently Owned Residential Properties	13-13
13.1.3.2	BMA Owned Residential Properties	13-13
13.1.4	Operational Noise Criteria	13-14
13.1.4.1	Introduction	13-14
13.1.4.2	Independently Owned Residential Properties	13-15
13.1.4.3	BMA/BMC Owned Residences.....	13-19
13.1.4.4	Low Frequency Noise	13-20
13.1.5	Transportation Noise Assessment Criteria.....	13-21
13.1.5.1	Rail.....	13-21
13.1.5.2	Road	13-21
13.1.6	Mine Noise Modelling Procedure	13-21
13.1.6.1	SoundPLAN	13-21
13.1.6.2	Meteorological Conditions	13-21
13.1.6.3	Modelling Scenarios	13-23
13.1.7	Transportation Noise Modelling Procedure.....	13-24
13.1.7.1	CoRTN Road Traffic Noise Prediction Method.....	13-24
13.1.7.2	Nordic Rail Traffic Noise Prediction Method.....	13-24
13.2	Potential Impacts.....	13-26
13.2.1	Noise Impact Assessment – Construction	13-26
13.2.2	Noise Impact Assessment – Operation.....	13-26
13.2.2.1	Steady State Plant – Fixed Plant and Conveyors and Gas Drainage Options.....	13-26
13.2.2.2	Conveyor Alarms	13-27
13.2.2.3	Variable Noise Sources - Mobile Plant and Rail Operations	13-27
13.2.3	Red Hill Accommodation Village	13-30
13.2.3.1	Noise Sources within the Proposed Red Hill Accommodation Village .	13-30
13.2.3.2	Red Hill Accommodation Village Noise at Receptor Locations	13-31
13.2.3.3	Blasting Assessment	13-31
13.2.4	Noise Impact Assessment – Transportation (Operation)	13-31
13.2.5	Noise Impact Assessment on Fauna	13-31
13.3	Noise Mitigation Measures	13-32
13.3.1.1	Construction.....	13-32
13.3.1.2	Operations	13-33

13.3.1.3	Noise Impacts from the Proposed Red Hill Accommodation Village....	13-34
13.3.1.4	Monitoring	13-34
13.3.1.5	Investigation of Complaints.....	13-34

Section 14 Transport

14.1	Description of Environmental Values	14-1
14.2	Existing Conditions	14-1
14.2.1	Road Network.....	14-1
14.2.1.1	Peak Downs Highway.....	14-1
14.2.1.2	Moranbah Access Road	14-1
14.2.1.3	Goonyella Road	14-4
14.2.1.4	Red Hill Road.....	14-4
14.2.1.5	Road Realignments	14-4
14.2.2	Road Crash History	14-4
14.2.3	Scheduled Road Improvement Projects.....	14-4
14.2.4	School Bus Routes	14-4
14.2.6	Background Traffic	14-6
14.2.6.1	Existing Traffic Volumes	14-6
14.2.6.2	Forecast Traffic Volumes.....	14-6
14.2.7	Rail Networks	14-6
14.2.8	Port Infrastructure.....	14-7
14.2.9	Air Transport.....	14-7
14.3	Traffic Generation.....	14-7
14.3.1	Construction Phase	14-7
14.3.2	Operation Phase	14-8
14.3.3	Overlap Scenario.....	14-8
14.4	Potential Impacts and Mitigation Measures	14-8
14.4.1	Traffic Impact Assessment.....	14-8
14.4.1.1	Assessment Network Volumes	14-8
14.4.1.2	Investigation Scope and Assessment Scenarios.....	14-9
14.4.1.3	Intersection Impacts and Mitigation	14-11
14.4.1.4	Rural Road Links	14-11
14.4.2	Pavement Impact Assessment.....	14-11
14.4.3	Haulage of Dangerous Goods and Wastes.....	14-11
14.4.4	Rail Impacts.....	14-12
14.4.5	Shipping.....	14-12
14.4.6	Air Transport.....	14-12
14.4.7	Impacts to Existing Infrastructure	14-12

Section 15 Waste Management

15.1	Introduction.....	15-1
15.2	Description of Environmental Values	15-1
15.2.1	Definition.....	15-1
15.2.2	Legislative Requirements	15-2
15.2.2.1	Commonwealth Requirements	15-2
15.2.2.2	State Requirements	15-3
15.2.2.3	Local Authority Requirements.....	15-3
15.2.3	Existing Waste Management Facilities	15-4
15.3	Description of Waste	15-4
15.3.1	Definition of Waste	15-4
15.3.2	Waste Management Hierarchy.....	15-5
15.3.3	Waste Management Strategies	15-5
15.4	Potential Impacts.....	15-6
15.5	Management Approach	15-6
15.5.1	Waste Generation and Management	15-6
15.5.1.1	Construction Waste	15-7
15.5.1.2	Operational Waste	15-14
15.5.1.3	Decommissioning	15-18
15.5.2	Cleaner Production and Waste Minimisation	15-19
15.5.3	Handling, Storage, Collection and Disposal.....	15-19
15.5.4	Waste Management Requirements.....	15-20

Section 16 Cultural Heritage

16.1	Cultural Heritage Legislation	16-1
16.1.1	Environment Protection and Biodiversity Conservation Act 1999.....	16-1
16.1.2	Aboriginal and Torres Strait Islander Heritage Protection Act 1984	16-1
16.1.3	Australian Heritage Council Act 2003	16-2
16.1.4	Aboriginal Cultural Heritage Act 2003	16-2
16.1.5	Queensland Heritage Act 1992	16-2
16.1.6	The Burra Charter	16-3
16.2	Aboriginal Cultural Heritage	16-3
16.2.1	Introduction.....	16-3
16.2.2	Description of Environmental Values	16-3
16.2.2.1	Desktop Review	16-4
16.2.2.2	Field Surveys	16-8
16.2.3	Potential Impacts and Mitigation Measures	16-9
16.2.3.1	Overview	16-9
16.2.3.2	Barada Barna Area Impacts	16-10
16.2.3.3	Wiri Core Area Impacts.....	16-10
16.2.3.4	Wiri 2 Area Impacts	16-10
16.2.3.5	Impact Management	16-11

16.3	Non-Indigenous Cultural Heritage	16-12
16.3.1	Description of Environmental Values	16-12
16.3.1.1	Historical Background	16-12
16.3.2	Field Survey.....	16-18
16.3.2.1	Survey Methodology	16-18
16.3.2.2	Sampling Strategy	16-18
16.3.2.3	Constraints to the Survey	16-18
16.3.2.4	Leaseholder Consultation	16-20
16.3.3	Historical Sites and Places Located Within the EIS Study Area	16-20
16.3.3.1	Summary.....	16-20
16.3.3.2	Significance Assessment.....	16-24
16.3.3.3	Cultural Heritage Potential within the EIS Study Area.....	16-28
16.3.4	Potential Impacts.....	16-28
16.3.4.1	Types of Potential Impacts	16-28
16.3.4.2	Project Impact on Places of Cultural Heritage Significance	16-29
16.3.4.3	Project Impact on Places of Historic Interest.....	16-29
16.3.4.4	Project Impact on Potential Further Historic Places/Items	16-29
16.3.5	Mitigation Measures	16-31
16.3.5.1	Approach to Managing Cultural Heritage	16-31
16.3.5.2	Further Survey of 'Old Station Yard' and Archaeological Monitoring of RHHI-04.....	16-31
16.3.5.3	Recording of Significant Sites and Places Potentially Impacted by the Project.....	16-31
16.3.5.4	Cultural Heritage Management within the Environmental Management Plan.....	16-31
16.3.5.5	Cultural Heritage Awareness Training.....	16-32

Section 17 Community

17.1	Introduction.....	17-1
17.2	Approach	17-1
17.3	Phases of Consultation	17-3
17.4	Stakeholder Participation Stage.....	17-3
17.4.1	2008 to 2010 Consultation Phase	17-3
17.4.2	2011 to 2012 Consultation Phase	17-3
17.4.2.1	Consultation Methods and Communication Tools	17-8
17.4.2.2	Representation of Stakeholder Groups	17-9
17.4.2.3	Stakeholder Engagement Methods	17-10
17.4.3	2012 to 2013 Consultation Phase	17-15
17.4.3.1	Draft EIS Comment Period	17-15
17.4.4	2014 to 2015 Consultation Phase	17-16
17.4.4.1	Supplementary EIS.....	17-16
17.4.5	Feedback and Complaints Process	17-16
17.5	Summary of Consultation Findings	17-18
17.5.1	All Stakeholders	17-18

17.5.1.1	Housing and/or Accommodation Affordability.....	17-19
17.5.1.2	Remote Workforce Arrangements	17-19
17.5.1.3	Attracting and Retaining Employees	17-20
17.5.1.4	Accommodation Village	17-20
17.5.1.5	Health and Emergency Services	17-20
17.5.1.6	Community Values.....	17-21
17.5.1.7	Workforce Behaviour and Community Safety.....	17-21
17.5.1.8	Dissatisfaction with Government	17-21
17.5.1.9	Other	17-21
17.5.2	Landholders Directly Impacted and Adjacent to the Project	17-22
17.5.3	Traditional Owner Representatives	17-22
17.5.4	Interested Parties	17-23
17.5.4.1	Local, Regional and Queensland-based Non-Government Organisations.....	17-23
17.5.4.2	Local and Regional Residents, including BMA Employees.....	17-25
17.5.5	Government.....	17-26
17.5.5.1	Commonwealth Government.....	17-26
17.5.5.2	Queensland Government.....	17-27
17.5.5.3	Local Government	17-28
17.6	EIS responses to Stakeholder Input.....	17-29
17.7	Ongoing Consultation.....	17-30

Section 18 Social

18.1	Introduction.....	18-1
18.2	The Project	18-1
18.3	Workforce	18-4
18.3.1	Construction	18-4
18.3.2	Operation.....	18-4
18.4	Accommodation.....	18-4
18.5	SIA Methodology	18-6
18.6	Cumulative Impacts.....	18-7
18.7	Stakeholder Inputs	18-7
18.8	Assumptions and Limitations.....	18-9
18.9	Social Baseline	18-10
18.9.1	Impacts, Opportunities and Mitigations	18-12
18.10	Regional Planning Outcomes.....	18-13
18.11	BMA Strategies.....	18-13
18.11.1	Workforce Development.....	18-13
18.11.2	Accommodation Village.....	18-14
18.11.3	Workforce Management.....	18-15

18.11.4 BMA's Local Buying Program (BLBP)	18-15
18.11.5 Community Development Strategy	18-16
18.11.6 Community Safety	18-16
18.12 Settlement Patterns	18-16
18.12.1 Directly Affected Properties	18-16
18.12.2 Properties Nearest the Project Site	18-17
18.12.3 Regional Settlement	18-18
18.13 Social and Cultural Values	18-20
18.13.1 Indigenous Values	18-20
18.13.2 Local and Regional Values	18-20
18.14 Demographic Characteristics	18-22
18.14.1 Population Size and Growth	18-22
18.14.2 Gender Diversity	18-23
18.14.3 Vulnerable Groups	18-24
18.15 Community Health and Safety	18-24
18.15.1 Community Health and Wellbeing	18-24
18.15.2 Advantage and Disadvantage	18-26
18.15.3 Cost of Living	18-26
18.15.4 Community Safety	18-27
18.16 Employment and Economic Development	18-28
18.16.1 Indigenous Engagement	18-28
18.16.2 Opportunities for Local Business	18-29
18.16.3 Skill Shortages	18-29
18.17 Social Infrastructure	18-31
18.17.1 Education and Training	18-31
18.17.2 Health Services and Facilities	18-31
18.17.3 Police and Emergency Services	18-32
18.17.4 Community and Civic Services	18-33
18.17.5 Recreation and Cultural Facilities	18-33
18.18 Housing	18-34
18.19 Cumulative Impacts	18-35
18.19.1 Impacts of Decommissioning	18-37
18.20 Impact Management and Monitoring	18-37
18.20.1 Approach	18-37
18.20.2 Stakeholder Engagement	18-38
18.20.3 Summary of Impacts and Mitigations	18-40
18.20.4 Significance Assessment	18-49
18.20.5 Monitoring Framework	18-53
18.20.6 Review Prior to Construction	18-54
18.20.7 Data Monitoring and Reporting	18-54
18.20.8 Stakeholder Engagement during Monitoring	18-56
18.20.9 Complaints Resolution	18-56

Section 19 Economic Assessment

19.1	Introduction.....	19-1
19.2	Methodology.....	19-3
19.2.1	Baseline and Broader Economic Assessment.....	19-4
19.2.1.1	Introduction.....	19-4
19.2.1.2	Social Profile.....	19-4
19.2.1.3	Employment.....	19-8
19.2.1.4	Economic Profile.....	19-12
19.2.1.5	Structure of Economy.....	19-14
19.2.1.6	Businesses.....	19-19
19.2.1.7	Consumer Price Index.....	19-21
19.2.1.8	Housing and Land Market Profile.....	19-23
19.2.1.9	Transport Infrastructure.....	19-33
19.2.1.10	Water Infrastructure.....	19-34
19.2.1.11	Energy Infrastructure.....	19-34
19.2.1.12	Social Infrastructure.....	19-34
19.2.1.13	Future Infrastructure Projects.....	19-34
19.3	Economic Impacts.....	19-38
19.3.1	Construction Phase.....	19-39
19.3.2	Operations Phase.....	19-40
19.3.2.1	Capital Expenditure.....	19-40
19.3.2.2	Employment.....	19-40
19.3.3	Indirect Employment.....	19-41
19.3.4	Opportunities for Local Businesses.....	19-41
19.3.4.1	Direct Project Expenditure.....	19-41
19.3.4.2	Local Expenditure by Project Employees.....	19-42
19.3.4.3	Local Expenditure Due to Indirect Employment Growth.....	19-42
19.4	Costs and Revenue to Government.....	19-42
19.4.1	Costs to Government.....	19-42
19.4.1.1	Rail.....	19-43
19.4.1.2	Port and Shipping Infrastructure.....	19-43
19.4.1.3	Roads.....	19-43
19.4.1.4	Power.....	19-44
19.4.1.5	Water.....	19-44
19.4.1.6	Other Payments.....	19-44
19.4.1.7	Project Workforce.....	19-45
19.4.1.8	Coal Royalties.....	19-45
19.4.1.9	Local Property Market Impacts.....	19-45
19.4.1.10	Implications for Future Development.....	19-45

Section 20 Health, Safety and Risk

20.1	Overview.....	20-1
20.2	Legislation and Policies.....	20-1
20.2.1	Legislative Compliance	20-1
20.2.2	BHP Billiton Mitsubishi Alliance Safety and Risk Management	20-4
20.3	Description of the Proposed Development.....	20-4
20.4	Dangerous Goods and Hazardous Substances.....	20-6
20.4.1	Construction Phase	20-7
20.4.2	Operational Phase.....	20-8
20.4.3	Concentration of Raw Materials	20-9
20.5	Project Risk Assessment.....	20-9
20.5.1	Method.....	20-9
20.5.2	Risk Analysis Criteria	20-10
20.5.3	Hazard Identification and Assessment.....	20-12
20.5.4	Risk Assessment – Conclusion.....	20-22
20.6	Hazard Mitigation Measures.....	20-23
20.6.1	Environmental Hazards and Controls	20-23
20.6.1.1	Air Quality / Dust.....	20-23
20.6.1.2	Noise.....	20-23
20.6.1.3	Chemical, Fuel, and Oil Storage and Handling	20-23
20.6.1.4	Flooding / Dam Failure	20-24
20.6.1.5	Mine Water Discharge	20-24
20.6.2	Workforce Safety.....	20-24
20.6.2.1	Emergency Services.....	20-24
20.6.2.2	Underground Working.....	20-25
20.6.2.3	Equipment and Plant	20-25
20.6.2.4	Vehicle Collision and Driving Conditions – On Site Activities.....	20-26
20.6.2.5	Personnel Interaction with Machinery.....	20-26
20.6.2.6	Fuel Storage	20-27
20.6.2.7	High Voltage Exposure	20-28
20.6.2.8	Flooding	20-28
20.6.2.9	Noise.....	20-28
20.6.2.10	Vectors and Pests.....	20-29
20.6.2.11	Working at Height and Falling Objects	20-29
20.6.2.12	Spontaneous Combustion of Coal.....	20-30
20.6.2.13	Security and Unauthorised Access.....	20-30
20.6.2.14	Safety and Health Management System	20-30
20.6.3	Public Health and Safety.....	20-32
20.6.3.1	Odour	20-33
20.6.3.2	Particulates and Gases/Vapours	20-33
20.6.3.3	Noise.....	20-34
20.6.3.4	Disease Vectors and Pests.....	20-34
20.6.3.5	Waste.....	20-34

20.6.3.6	Chemicals	20-35
20.6.3.7	Groundwater Quality	20-35
20.6.3.8	Surface Water Quality	20-36
20.6.3.9	Flooding	20-36
20.6.3.10	Traffic Accidents	20-36
20.7	Future Risk Assessment	20-37
20.8	Continuous Monitoring	20-37
20.9	Emergency Management	20-38
20.9.1	Emergency Management Plan	20-38
20.9.2	Incident Reporting and Investigation	20-41

Section 21 Cumulative Impacts

21.1	Introduction	21-1
21.1.1	Objective	21-1
21.1.2	Overview	21-1
21.2	Relevant Projects	21-2
21.2.1	The project	21-2
21.2.2	Other Relevant New or Developing Projects	21-2
21.2.3	Existing Developments	21-5
21.3	Cumulative Impacts	21-7
21.3.1	Land Resources	21-7
21.3.1.1	Method of Assessing Land Resource Impacts	21-7
21.3.1.2	Cumulative Land Resource Measurement	21-7
21.3.1.3	Assessment	21-9
21.3.2	Scenic Amenity	21-10
21.3.2.1	Regional Cumulative Impacts	21-10
21.3.2.2	EIS Study Area Localised Cumulative Impacts	21-10
21.3.3	Surface Water Resources	21-10
21.3.3.1	Water Quality	21-10
21.3.3.2	Subsidence	21-12
21.3.3.3	Flooding	21-13
21.3.3.4	Surface Water Flows	21-13
21.3.4	Groundwater	21-13
21.3.5	Terrestrial Ecology	21-15
21.3.6	Aquatic Ecology	21-16
21.3.7	Air Quality	21-17
21.3.7.1	Background Creep	21-18
21.3.7.2	Cumulative Future Air Quality Environment	21-18
21.3.8	Noise and Vibration	21-23
21.3.8.1	Eaglefield Coal Mine Expansion	21-23
21.3.8.2	Grosvenor Coal Mine	21-24
21.3.8.3	Bowen Gas Project	21-24
21.3.8.4	Bowen Gas Pipeline	21-24

21.3.9	Traffic, Transport and Infrastructure.....	21-24
21.3.9.1	Roads - Construction Phase.....	21-24
21.3.9.2	Roads - Operation Phase	21-25
21.3.9.3	Air.....	21-26
21.3.9.4	Rail.....	21-26
21.3.9.5	Shipping	21-26
21.3.9.6	Regional Infrastructure Provision.....	21-27
21.3.10	Waste Management	21-28
21.3.11	Social.....	21-29
21.3.11.1	Community Characteristics and Gender Diversity.....	21-29
21.3.11.2	Indigenous Social Characteristics and Economic Development	21-30
21.3.11.3	Education, Training and Childcare	21-32
21.3.11.4	Housing and Accommodation.....	21-33
21.3.11.5	Business, Industry and Employment	21-34
21.3.11.6	Income and Cost of Living	21-36
21.3.11.7	Social Infrastructure and Community Safety	21-37
21.3.11.8	Police and Emergency Services	21-39
21.3.11.9	Health and Well-being	21-40
21.3.11.10	Community Cohesion and Social Networks	21-41
21.3.11.11	Residential Amenity, Recreation and Liveability.....	21-41
21.3.11.12	Land Use and Private Tenure Ownership	21-42
21.3.11.13	Mitigation of Cumulative Social Impacts.....	21-42
21.3.12	Economic.....	21-45
21.3.12.1	Businesses Creation and Industry Growth	21-45
21.3.12.2	Labour Force and Skill Shortages	21-46

Section 22 References

22.0	Executive Summary	22-1
22.1	Introduction.....	22-2
