

Mt Arthur Coal Annual Coal Transport Report FY17

This report has been prepared in accordance with Schedule 3 Condition 46 of Project Approval 09_0062 MOD 1:

Monitoring of Coal Transport

46. The Proponent shall keep records of the:
- amount of coal transported from the site in each financial year;
 - number of coal haulage train movements generated by the Mt Arthur mine complex (on a daily basis); and
 - make these records available on its website at the end of each financial year.

For the 12 month period ending 30 June 2017:

- 16.48 million tonnes of export product coal was transported by rail to the Port of Newcastle. This is compliant with Schedule 2 Condition 7(a) of Project Approval 09_0062 MOD 1, which restricts Mt Arthur Coal's coal transport on the Antiene rail spur to a maximum of 27 million tonnes of product coal in a financial year;
- 1.4 million tonnes of domestic product coal was transported by conveyor to the Bayswater Power Station;
- The total number of train movements was 3,882; and
- The maximum number of train movements in a single day was 20, which occurred on nine separate days throughout the reporting period. This is compliant with Schedule 2 Condition 7(b) of Project Approval 09_0062 MOD 1, which restricts Mt Arthur Coal's coal transport on the Antiene rail spur to a maximum of 30 train movements a day.

Note: Each train entering and exiting the site is classified as two train movements and a day refers to the 24 hours from midnight to midnight the next day.

Table 1. Daily train movements FY17
