

# NEWS RELEASE

**Release Time**                      IMMEDIATE

**Date**                                      21 October 2009

**Number**                                  19/09

## **BHP BILLITON PRODUCTION REPORT FOR THE QUARTER ENDED 30 SEPTEMBER 2009**

- **Record quarterly iron ore production, despite the impact of tie-in activities associated with Rapid Growth Project (RGP) 4 (Australia).**
- **Record quarterly petroleum production achieved with the continued ramp up of commissioned projects and strong operating performance. On track to deliver 10 per cent compound annual growth for the 2010 financial year.**
- **Quarterly production records achieved at North West Shelf, Hunter Valley Energy Coal (both Australia) and Zamzama (Pakistan).**
- **Shenzi (USA) and Samarco (Brazil) operated above nameplate capacity during the quarter.**
- **During the quarter repairs to the Laguna Seca mill at Escondida (Chile) were successfully completed, however quarterly production was impacted due to the plant repair downtime.**
- **On 6 October 2009, one of the two haulage systems at Olympic Dam (Australia) was damaged. We anticipate that ore hoisting will be at approximately 25 per cent of capacity until full production resumes in the third quarter of the 2010 financial year.**

Over the last three months there has been increasingly positive economic news across most economies. Chinese economic growth continues to be robust on the back of strong domestic focused consumption and infrastructure-based stimulus spending. China's re-stock of commodities is essentially complete and there is now evidence of higher than normal stockpiles across the supply chain. We continue to look for Chinese imports to more closely reflect real demand over the remainder of 2009 calendar year.

There are signs of stabilisation in the developed economies, with positive signs of improvement in Industrial Production, the Purchasing Managers Index and a turn in consumer confidence. However, unemployment in key developed economies, such as the US, Japan and Europe, continues to lag and may trend higher in the near term. We are starting to see some positive impact of re-stocking of pipelines, particularly in steel making raw materials, after a period where demand essentially disappeared.

Despite the low metal inventories in developed economies, there is little evidence yet of sustainable demand for metals emerging post the northern summer. We continue to stress that this developed economy improvement is not without volatility and is from a very low base. We maintain our view that real demand follow-through in developed economies may not be transparent until mid-2010 calendar year.

## Petroleum

	SEPT 2009 QTR	SEPT Q09 vs SEPT Q08	SEPT Q09 vs JUNE Q09
Crude Oil, Condensate and Natural Gas Liquids ('000 bbl)	24,670	30%	15%
Natural Gas (bcf)	99.24	4%	2%
Total Petroleum Products (million boe)	41.21	18%	10%

**Total Petroleum Production** – Production hit an all time high due to the successful delivery of projects in the deepwater of Gulf of Mexico (USA) and Western Australia over the past two years. Operational performance was steady and benefited from the absence of weather related interruptions. This was partly offset by natural field decline.

**Crude Oil, Condensate, and Natural Gas Liquids** – Production was significantly higher than the comparative period due to Shenzi operating above designed capacity, increased production from Atlantis (USA) and the absence of weather related interruptions. During the quarter, the operator commenced drilling water injection wells at Atlantis.

**Natural Gas** – Record production was achieved due to stronger demand for gas in Pakistan and the contribution from Shenzi and Atlantis. Bass Strait (Australia) production was higher than the June 2009 quarter due to expected seasonal demand.

## Aluminium

	SEPT 2009 QTR	SEPT Q09 vs SEPT Q08	SEPT Q09 vs JUNE Q09
Alumina ('000 tonnes) (a)	841	-2%	-5%
Aluminium ('000 tonnes)	313	1%	1%

**Alumina** – Production was lower than the June 2009 quarter due to an unplanned calciner outage at Worsley (Australia). The stockpiled hydrate should be recovered over the remainder of the financial year.

Production at Alumar (Brazil) benefited from the recently expanded refinery, which will continue to ramp up gradually. However this increase was offset by planned and unplanned maintenance.

**Aluminium** – Production across all operations was in line with comparative periods.

## Base Metals

	SEPT 2009 QTR	SEPT Q09 vs SEPT Q08	SEPT Q09 vs JUNE Q09
Copper ('000 tonnes)	283.9	-8%	-8%
Lead (tonnes)	61,370	5%	5%
Zinc (tonnes)	46,425	11%	5%
Silver ('000 ounces)	10,769	5%	0%
Uranium Oxide Concentrate (Uranium) (tonnes)	1,130	2%	-2%

**Copper** – Production during the September 2009 quarter was impacted by maintenance activities at Escondida and Olympic Dam (Australia). This was partially offset by higher production as Spence (Chile) operated at plant capacity during the quarter. The repairs to Escondida's Laguna Seca SAG mill were successfully completed in August 2009, however the repairs impacted production in the quarter. Escondida's production in the 2010 financial year is expected to increase by approximately five to 10 per cent due to the successful repairs to Laguna Seca mill and higher average grade.

On 6 October 2009, the haulage system in the Clark Shaft at Olympic Dam was damaged. A full investigation is underway to determine the extent of the damage. Hoisting is continuing at the secondary Whenan Shaft, but at this stage, we expect ore hoisting will be at approximately 25 per cent of capacity until full production resumes in the third quarter of the 2010 financial year.

**Lead** – Production was higher than both comparative periods as a result of higher grade and improved recoveries at Cannington (Australia).

**Zinc** – Production was higher than both comparative periods due to better grade and an increased proportion of ore containing zinc at Antamina (Peru).

**Silver** – Production was higher than the September 2008 quarter due to higher grade at Cannington and Antamina. Production was in line with the June 2009 quarter.

**Uranium** – Production was in line with all comparative periods. Production will be impacted by the Olympic Dam incident noted above.

## Diamonds & Specialty Products

	SEPT 2009 QTR	SEPT Q09 vs SEPT Q08	SEPT Q09 vs JUNE Q09
Diamonds ('000 carats)	780	1%	-14%

**Diamonds** – Production decreased versus the June 2009 quarter mainly due to lower ore processed. Production continues to be influenced by variability of ore sources due to the mix of open pit and underground mining.

## Stainless Steel Materials

	SEPT 2009 QTR	SEPT Q09 vs SEPT Q08	SEPT Q09 vs JUNE Q09
Nickel ('000 tonnes) (b)	35.4	100%	-13%

**Nickel** – Production for the quarter was impacted by a restriction in hydrogen supply at Kwinana Nickel Refinery (Australia) and planned maintenance at Cerro Matoso (Colombia). The September 2008 quarter included the major furnace rebuild at the Kalgoorlie Nickel Smelter (Australia).

## Iron Ore

	SEPT 2009 QTR	SEPT Q09 vs SEPT Q08	SEPT Q09 vs JUNE Q09
Iron Ore ('000 tonnes)	30,106	1%	11%

**Iron Ore** – Production was higher than the June 2009 quarter reflecting improved performance at Western Australia Iron Ore (Australia) and all three pellet plants at Samarco (Brazil) operating since July 2009.

As RGP 4 is nearing completion, existing operations will continue to be impacted by tie-in activities in the next quarter.

## Manganese

	SEPT 2009 QTR	SEPT Q09 vs SEPT Q08	SEPT Q09 vs JUNE Q09
Manganese Ore ('000 tonnes)	1,156	-37%	131%
Manganese Alloy ('000 tonnes)	63	-69%	152%

**Manganese Ore** – Market conditions progressively recovered during the quarter. However, the September 2009 quarterly production was limited due to larger than optimal stockpiles at the start of the quarter. As a result of improved demand and depletion of stockpiles, we expect to be operating near full capacity towards the end of the December 2009 quarter.

**Manganese Alloy** – As demand conditions improved, stockpiles were drawn down and furnaces were restarted during the September 2009 quarter. We expect to be operating at about 65 percent of capacity towards the end of the December 2009 quarter.

## Metallurgical Coal

	SEPT 2009 QTR	SEPT Q09 vs SEPT Q08	SEPT Q09 vs JUNE Q09
Metallurgical Coal ('000 tonnes)	9,404	2%	-1%

**Metallurgical Coal** – Production was in line with previous periods. Shipments continued to increase during the quarter in response to stronger demand conditions.

## Energy Coal

	SEPT 2009 QTR	SEPT Q09 vs SEPT Q08	SEPT Q09 vs JUNE Q09
Energy Coal ('000 tonnes)	18,059	0%	2%

**Energy Coal** – Production was in line with previous periods. Record quarterly production at Hunter Valley Energy Coal due to improved plant utilisation.

- 
- (a) Excluding Suriname which was sold effective 31 July 2009.  
(b) Excluding Yabulu which was sold effective 31 July 2009.

Throughout this report, unless otherwise stated, production volumes refer to BHP Billiton share and exclude suspended and sold operations.

This report together with the Exploration and Development Report represent the Interim Management Statement for the purposes of the UK Listing Authority's Disclosure and Transparency Rules. There have been no significant changes in the financial position of the Group in the quarter ended 30 September 2009.

Further information on BHP Billiton can be found on our Internet site: [www.bhpbilliton.com](http://www.bhpbilliton.com).

- (a) LPG and Ethane are reported as Natural Gas Liquid (NGL). Product-specific conversions are made and NGL is reported in barrels of oil equivalent (boe).
- (b) Suriname was sold effective 31 July 2009.
- (c) Metal production is reported on the basis of payable metal.
- (d) The Pinto Valley operations were placed on care and maintenance in February 2009.
- (e) Yabulu was sold effective 31 July 2009.
- (f) Iron ore production is reported on a wet tonnes basis.
- (g) Shown on 100% basis. BHP Billiton interest in saleable production is 60%.
- (h) Production includes Medium Carbon Ferro Manganese.
- (i) Metallurgical coal production is reported on the basis of saleable product. Production figures include some thermal coal.
- (j) Shown on 100% basis. BHP Billiton interest in saleable production is 80%.
