

NEWS RELEASE

Release Time IMMEDIATE
Date 17 April 2013
Number 05/13

BHP BILLITON PRODUCTION REPORT FOR THE NINE MONTHS ENDED 31 MARCH 2013

- Full year production guidance is retained for our major businesses following another quarter of robust operating performance.
- Western Australia Iron Ore achieved record production for the nine month period ended March 2013. Production guidance of 183 million tonnes (100% basis) for the 2013 financial year remains unchanged, despite cyclone related downtime during the period. An annualised production rate approaching 200 million tonnes (100% basis) is anticipated for the June 2013 quarter.
- Onshore US produced more than five million barrels of liquids during the March 2013 quarter and the Eagle Ford is now our single largest liquids producing field. Petroleum production guidance for the 2013 financial year remains unchanged at approximately 240 million barrels of oil equivalent.
- Copper in concentrate production at Escondida increased by 61% during the nine month period ended March 2013. Total Escondida copper production remains on track to increase by at least 20% in the 2013 financial year.
- Queensland Coal production was affected by adverse weather conditions during the March 2013 quarter. However, recently installed flood mitigation infrastructure enabled a rapid recovery in performance and the business was operating at full supply chain capacity at the end of the period.

Petroleum

	MAR 2013 YTD	MAR 2013 QTR	MAR YTD13 vs MAR YTD12	MAR Q13 vs MAR Q12	MAR Q13 vs DEC Q12
Crude oil, condensate and natural gas liquids ('000 boe)	66,610	20,871	1%	-4%	-10%
Natural gas (bcf)	659.78	207.27	10%	-1%	-6%
Total petroleum products (million boe)	176.57	55.42	6%	-2%	-7%

Total petroleum production – An average production rate of 644 thousand barrels of oil equivalent per day was achieved during the nine month period ended March 2013. Guidance for the 2013 financial year remains unchanged at approximately 240 million barrels of oil equivalent.

Crude oil, condensate and natural gas liquids – A 15 per cent increase in liquids production at our Onshore US business during the March 2013 quarter partially offset cyclone related downtime at our Western Australian operations, extended maintenance and drilling delays at our non-operated facilities in the Gulf of Mexico (US) and natural field decline.

Onshore US produced more than five million barrels of liquids during the March 2013 quarter and the Eagle Ford is now our single largest liquids producing field. These record volumes are expected to grow further in the June 2013 quarter as additional wells come online and infrastructure projects are completed.

Natural gas – A reduction in gas production in the March 2013 quarter reflected lower levels of drilling activity in our dry gas Haynesville and Fayetteville fields (US) and a seasonal reduction in natural gas demand at Bass Strait (Australia).

Aluminium and Nickel

	MAR 2013 YTD	MAR 2013 QTR	MAR YTD13 vs MAR YTD12	MAR Q13 vs MAR Q12	MAR Q13 vs DEC Q12
Alumina ('000 tonnes)	3,615	1,213	16%	15%	-2%
Aluminium ('000 tonnes)	871	304	-4%	10%	2%
Nickel ('000 tonnes)	113.8	42.1	-1%	1%	21%

Alumina – The continued ramp up of the Efficiency and Growth project at Worsley (Australia) contributed to record alumina production for the nine month period ended March 2013.

Aluminium – An increase in metal production from the March 2012 quarter reflected a return to full technical capacity at Hillside (South Africa).

Nickel – Nickel production increased by 21 per cent from the December 2012 quarter as the Nickel West smelter and refinery (Australia) returned to full capacity following the successful completion of planned maintenance in the prior period. Total nickel production was further supported by strong performance at Cerro Matoso (Colombia).

Base Metals

	MAR 2013 YTD	MAR 2013 QTR	MAR YTD13 vs MAR YTD12	MAR Q13 vs MAR Q12	MAR Q13 vs DEC Q12
Copper ('000 tonnes)	876.2	307.1	12%	9%	4%
Lead (tonnes)	147,398	49,080	-16%	-8%	6%
Zinc (tonnes)	82,324	30,193	1%	2%	15%
Silver ('000 ounces)	26,565	8,843	-11%	-9%	3%
Uranium oxide concentrate (Uranium) (tonnes)	2,989	933	7%	4%	-8%

Copper – Copper in concentrate production at Escondida (Chile) increased by 61 per cent during the nine month period ended March 2013. Production benefited from an increase in the average copper grade mined to 1.4 per cent. Total Escondida copper production remains on track to increase by at least 20 per cent in the 2013 financial year.

Antamina (Peru) achieved record production for the nine month period ended March 2013, despite a temporary reduction in the copper to zinc ore grade ratio during the recent quarter. Olympic Dam (Australia) production increased by 42 per cent in the March 2013 quarter following the completion of major planned maintenance in the prior period.

Lead/silver – Lead and silver production decreased at Cannington (Australia) during the nine month period ended March 2013 due to lower average ore grades.

Zinc – Production increased by 15 per cent from the December 2012 quarter and reflected a temporary increase in the grade profile at Antamina.

Uranium – Uranium production increased by seven per cent during the nine month period ended March 2013 due to higher recoveries and increased plant availability at Olympic Dam.

Diamonds and Specialty Products

	MAR 2013 YTD	MAR 2013 QTR	MAR YTD13 vs MAR YTD12	MAR Q13 vs MAR Q12	MAR Q13 vs DEC Q12
Diamonds ('000 carats)	930	322	-32%	-26%	9%

Diamonds – On 10 April 2013, BHP Billiton completed the sale of its diamonds business, comprising its interests in the EKATI Diamond Mine and Diamonds Marketing operations, to Dominion Diamond Corporation for an aggregate cash consideration of US\$553 million (after adjustments).

Iron Ore

	MAR 2013 YTD	MAR 2013 QTR	MAR YTD13 vs MAR YTD12	MAR Q13 vs MAR Q12	MAR Q13 vs DEC Q12
Iron ore ('000 tonnes)	122,167	40,205	3%	6%	-5%

Iron ore – Western Australia Iron Ore (WAIO) achieved record production for the nine month period ended March 2013. Production guidance of 183 million tonnes (100 per cent basis) for the 2013 financial year remains unchanged, despite cyclone related downtime during the period. An annualised production rate approaching 200 million tonnes (100 per cent basis) is anticipated for the June 2013 quarter.

The Jumblebar Mine Expansion is on schedule for first production in the March 2014 quarter and will broadly match mine and port capacity at 220 million tonnes per annum (100 per cent basis). The progressive debottlenecking of the supply chain is expected to underpin substantial low cost, longer term growth in our WAIO business.

Samarco (Brazil) continued to operate at capacity during the March 2013 quarter.

Manganese

	MAR 2013 YTD	MAR 2013 QTR	MAR YTD13 vs MAR YTD12	MAR Q13 vs MAR Q12	MAR Q13 vs DEC Q12
Manganese ore ('000 tonnes)	6,271	2,008	7%	-2%	-5%
Manganese alloy ('000 tonnes)	426	143	-19%	4%	-7%

Manganese ore – Record ore production for the nine month period ended March 2013 reflected a substantial improvement in plant availability at GEMCO (Australia), the world's largest and lowest cost manganese operation.

Manganese alloy – The decrease in alloy volumes during the nine month period ended March 2013 was largely attributable to the permanent closure of energy intensive silicomanganese production at Metalloys (South Africa) in January 2012.

Metallurgical Coal

	MAR 2013 YTD	MAR 2013 QTR	MAR YTD13 vs MAR YTD12	MAR Q13 vs MAR Q12	MAR Q13 vs DEC Q12
Metallurgical coal ('000 tonnes)	26,792	8,966	7%	22%	1%

Metallurgical coal – Queensland Coal (Australia) production was affected by adverse weather conditions during the March 2013 quarter. However, recently installed flood mitigation infrastructure enabled a rapid recovery in performance and the business was operating at full supply chain capacity at the end of the period. South Walker Creek achieved record quarterly production following the completion of a wash plant upgrade in the prior period.

Our Queensland Coal operations achieved a significant milestone during the quarter with first production achieved at the Daunia mine, ahead of schedule. The ramp up of this mine and future commissioning of Caval Ridge will underpin an increase in the capacity of our Queensland Coal business to 66 million tonnes per annum (100 per cent basis) by the end of the 2014 calendar year.

A planned longwall move at the Dendrobium mine resulted in lower production at Illawarra Coal (Australia) in the March 2013 quarter. A longwall move is scheduled at the West Cliff mine during the June 2013 quarter.

Energy Coal

	MAR 2013 YTD	MAR 2013 QTR	MAR YTD13 vs MAR YTD12	MAR Q13 vs MAR Q12	MAR Q13 vs DEC Q12
Energy coal ('000 tonnes)	53,349	15,486	1%	-10%	-15%

Energy coal – New South Wales Energy Coal (Australia) continued to benefit from the ramp up of the RX1 project with record production achieved for the nine month period ended March 2013. Production in the March 2013 quarter was affected by adverse weather conditions on the east coast of Australia and industrial action at Cerrejon Coal (Colombia) that preceded successful resolution of a new three year Enterprise Agreement.

This report, together with the Exploration and Development Report, represents the Interim Management Statement for the purposes of the UK Listing Authority's Disclosure and Transparency Rules. There have been no significant changes in the financial position of the Group in the quarter ended 31 March 2013.

- (a) LPG and ethane are reported as Natural Gas Liquid (NGL). Product-specific conversions are made and NGL is reported in barrels of oil equivalent (boe).
- (b) Metal production is reported on the basis of payable metal.
- (c) Includes Cerro Colorado and Spence.
- (d) Iron ore production is reported on a wet tonnes basis.
- (e) Newman includes Mt Newman Joint Venture and Jimblebar.
- (f) Shown on 100% basis. BHP Billiton interest in saleable production is 60%, except Hotazel Manganese Mines which is 44.4%.
- (g) Production includes Medium Carbon Ferro Manganese.
- (h) Metallurgical coal production is reported on the basis of saleable product. Production figures include some thermal coal.
- (i) Shown on 100% basis. BHP Billiton interest in saleable production is 80%.
