

# APPENDIX H

## CONTENTS

- H1 Upper Spencer Gulf marine species list**
- H2 Water and sediment quality**
  - H2.1 Water quality field sampling report
  - H2.2 Additional water quality data
  - H2.3 Pilot desalination plant water quality
  - H2.4 Marine sediment sampling at Point Lowly
  - H2.5 Marine sediment chemistry at Point Lowly
- H3 Comparisons with other desalination plants**
- H4 Ecotoxicology**
  - H4.1 Toxicity testing on larval kingfish
  - H4.2 Toxicity testing on the sponge *Aplysine* sp.
  - H4.3 Refined assessment of safe dilutions
- H5 ELCOM model development**
  - H5.1 Introduction and testimonial letters
  - H5.2 Spencer Gulf model validation report
  - H5.3 Comparison of Olympic Dam EIS and Kaempf models
  - H5.4 Additional analyses of 2009 oceanographic data
  - H5.5 Additional oceanographic data collected in 2010
- H6 Diffuser design investigation**
- H7 Hydrodynamic modelling assessments**
  - H7.1 Introduction and testimonial letter
  - H7.2 Spencer Gulf modelling assessments (280 ML per day desalination plant)
  - H7.3 Spencer Gulf modelling assessments (200 ML per day desalination plant)
  - H7.4 Hydrodynamic modelling animations

## **H8 Salt balance of Northern Spencer Gulf**

- H8.1 Long-term effects of desalination and climate change
- H8.2 Water exchange rate calculations

## **H9 Ecological assessments**

- H9.1 Significant species in Upper Spencer Gulf
- H9.2 Regional significance of the Point Lowly sponge community
- H9.3 Giant Australian Cuttlefish population surveys
- H9.4 Point Lowly dolphin survey
- H9.5 Habitat requirements of commercial and recreational species near Point Lowly

## **H10 Entrainment assessments**

Testimonial letter

- H10.1 Survey of planktonic larvae near Point Lowly
- H10.2 Entrainment threat assessment

## **H11 Assessment of bow waves and propeller wash**
