BHP Billiton Iron Ore

Ecohydrological Conceptualisation of Fortescue Marsh Region - Map Book

Map 1-01 Regional location
Map 1-02 Study area with key features
Map 2-01 Climate and rainfall gauge locations
Map 2-02 Study area topography
Map 2-03 Drainage and ecohydrological unit distribution
Map 2-04 Regional geology – pre-tertiary
Map 2-05 Surface geology
Map 2-06 IBRA regions
Map 2-07 Land systems
Map 2-08 Vegetation associations (Beard, 1975) in the Fortescue Marsh study area
Map 2-09 Vegetation survey areas within the Fortescue Marsh study area
Map 2-10 EPA (2013) Fortescue Marsh management zones and proposed 2015 exclusion zones
Map 3-01 Regional catchments
Map 3-02 Inferred depth to groundwater
Map 3-03 Inferred regional watertable contours
Map 3-04 Major ion chemistry of groundwater
Map 3-05 Groundwater salinity as TDS
Map 3-06 Inferred groundwater salinity contours
Map 4-01 Distribution of ecohydrological units in the study area
Map 4-02 Freshwater Claypans

Map 5-01 Stressor Conceptualisation Features – BHP Billiton Iron Ore Marillana
Map 5-02 Stressor Conceptualisation Features – BHP Billiton Iron Ore Mindy
Map 5-03 Stressor Conceptualisation Features – BHP Billiton Iron Ore Coordiner
Map 5-04 Stressor Conceptualisation Features – BHP Billiton Iron Ore Roy Hill (West)
Map 5-05 Stressor Conceptualisation Features – BHP Billiton Iron Ore Roy Hill (East)
Map 5-06 Third Party Stressors
Map B-01 Digital elevation model coverage (1 sec/ 5m)
Map B-02 Locations of hydrogeological and exploration bores
Map B-03 Spatial distribution of groundwater level records
Map B-04 Distribution of hydrochemical samples
The content of this map is conceptual only, of a general nature and does not purport to contain all information relevant to future project development associated with the Project. This map has been prepared solely for the purpose of informing environmental impact assessment pursuant to the Environmental Protection Act 1986 (WA) and Environment Protection and Biodiversity Conservation Act 1999 and is not intended to be used for any other purpose.

No representation or warranty is given that project development associated with any or all of the disturbance indicated on this map will actually proceed. As project development is dependent upon future events, the outcome of which is uncertain and cannot be assured, actual development may vary materially from this conceptual map.
Fortescue Marsh Ecohydrological Conceptualisation - Map Book

Legend
- Study area
- Total dissolved solids (mg/L)
  - more than 100,000
  - 10,000 to 100,000
  - 5,000 to 10,000
  - 2,000 to 5,000
  - 1,000 to 2,000
  - 500 to 1,000
  - 200 to 500
  - less than 200

Ecohydrological units
- 1 - Hills, mountains, plateaux
- 2 - Dissected slopes, plains
- 3 - Upland transitional areas
- 4 - Upland channel zones
- 5 - Sand plains
- 6 - Alluvial plains
- 7 - Calcrete plains
- 8 - Lowland major channel systems
- 9 - Lowland receiving areas

Status: Final V8
Project No.: 83501069

Sep 2015
