Welcome
BHP Potash Export Facility
at Fraser Surrey Docks
BHP Billiton Canada Inc. (BHP) is a leading global resources company with assets and projects in iron ore, petroleum, copper and coal. BHP proposes to construct a potash export facility at Fraser Surrey Docks in Surrey, B.C. to export potash from the proposed Jansen mine in Saskatchewan.

Subject to regulatory and internal approvals, BHP would design and construct an export facility to receive and store rail shipments of potash and load onto bulk ocean-going vessels.

Additional information about the company is available on BHP’s corporate website at www.bhp.com
About the Project

Subject to regulatory and internal approvals, BHP would construct an export facility to receive and store rail shipments of potash and load onto bulk ocean-going vessels. The proposed facility, with a throughput of 8 million tonnes per annum (Mtpa), will:

- Receive shipments of product by rail from the proposed Jansen mine
- Offload products from rail cars to the conveyor system
- Store potash in the storage building
- Transfer products from the potash storage building via conveyors to the ship loader and to a waiting vessel for export

When throughput at the facility reaches the projected 8 Mtpa, 9 to 10 trains per week are expected. Vessels loading at the facility are expected to range from Handysize up to Kamsarmax size with three to four vessels loading per week.

Project Status

We are in the preliminary review phase of the Project and Environmental Review Process for the Vancouver Fraser Port Authority. We look forward to sharing more information as it becomes available. A second round of public consultation will be conducted after the permit application is accepted for review by the port authority.
Technical Studies

As part of the permit application, technical studies are being undertaken in the following areas:

**Engineering Studies including:**
- Hazardous materials report for demolition
- Lighting
- Geotechnical
- Marine structures

**Environmental Assessment Studies including:**
- Noise
- Air quality
- View & shade
- Traffic impact
- Habitat Assessment

**Project Plans including:**
- Stormwater pollution prevention
- Construction environmental management
- Rail operations
- Spill prevention and emergency response

The Vancouver Fraser Port Authority’s website provides information about the Project and Environmental Review Process, and technical guidelines for the above studies.
