

# Operational review for the quarter ended 30 September 2025

### Delivering operational and project excellence into a constructive commodity price environment

"We've made a strong start to the year, highlighted by disciplined operating performance and execution of scheduled maintenance. Group copper production rose 4%, with record concentrator throughput at Escondida.

In iron ore, WAIO delivered another standout quarter, achieving record material mined while completing critical infrastructure upgrades ahead of schedule.

In steelmaking coal, production rose 8%, supported by strong mining rates at Broadmeadow and increased stripping at our open cut mines.

We progressed key growth and decarbonisation milestones in the quarter, including securing environmental approval for the Laguna Seca Expansion at Escondida and Copper South Australia entering into its largest renewable electricity agreement.

Both stages of the Jansen potash project in Canada are advancing, with Stage 1 reaching 73% completion and on track for production to begin in 2027, while Stage 2 is now 13% complete. The long-term demand fundamentals for potash are attractive and Jansen is expected to be one of the lowest cost producers.

Overall macro-economic signals for commodity demand remain resilient, and global growth forecasts are moving higher. While we expect some deceleration in growth in H2 CY25, in China we still expect GDP growth of ~5% for the year. In copper, major disruptions at some of our competitors' mines have tightened overall market fundamentals, benefitting our world-class portfolio of assets.

With momentum from a strong first quarter, BHP is on track to deliver on full-year guidance and we are making progress on our growth pipeline across Australia and the Americas."

Mike Henry, BHP Chief Executive Officer

# Summary

# Operational and project excellence

# Strong performance; maintenance executed

Copper production increased 4% driven by record concentrator throughput at Escondida. Performance at Copper SA was strong and major planned maintenance was safely executed.

In our steelmaking commodities, WAIO achieved record Q1 material mined and a 5% increase in lump sales, while delivering the planned rebuild of Car Dumper 3 (CD3) ~8% ahead of schedule. BMA production increased 8% enabled by strong stripping performance and improved mining rates at Broadmeadow.

## Strong balance sheet

# Successful capital management

During the quarter, BHP issued EUR bonds totalling EUR 1.4 bn and USD bonds totalling US\$1.5 bn competitively priced across four tranches and refinanced its US\$5.5 bn revolving credit facility.

These demonstrate disciplined execution underpinning our strong balance sheet.

## **Portfolio**

## **Progressing our organic growth options**

In September, we received approval for the Environmental Impact Declaration (DIA) for the Laguna Seca Expansion at Escondida. The DIA permit for the Escondida New Concentrator remains on track to be submitted in H2 FY26.

BHP welcomed state and federal ministers for a site visit to Copper SA, where we are progressing initiatives aimed at increasing growth through strengthening mining productivity as we continue building a world-class copper province.

### Social value

# A continued evolution as we grow

In September, we held an ESG Roundtable covering operational decarbonisation, Scope 3 steelmaking emissions, Indigenous partnerships, and the Doce River Basin Agreement (Samarco).

Copper South Australia entered into its largest renewable electricity supply agreement, taking another step forward in its operational decarbonisation journey.

# Segment and asset performance | FY26 YTD v FY25 YTD

Further information in Appendix 1

Detailed production and sales information for all operations in Appendix 2

# Copper

Production

494 kt +4%

**Q1 FY25** 476 kt

FY26e 1,800 - 2,000 kt

Average realised price

US\$4.59/lb +8%

**Q1 FY25** US\$4.24/lb

Total copper production increased 4% to 494 kt. Copper production guidance for FY26 remains unchanged at between 1,800 and 2,000 kt.

## Escondida 328.9 kt #8% (100% basis)

We are investigating an incident on 9 October where a contracting team member passed away. Our thoughts are with the team member's family. We are working closely with the relevant authorities. There have been no operational impacts as a result of the event.

Increased production was driven by record concentrator throughput and improved recoveries, partially offset by a lower concentrator feed grade of 0.94% (Q1 FY25: 1.00%). Cathode production was higher in line with the continued ramp-up of the Full SaL leaching project which achieved first production in Q4 FY25.

Production guidance for FY26 remains unchanged at between 1,150 and 1,250 kt and is expected to be weighted to the first half in line with higher concentrator feed grade. Concentrator feed grade of ~0.85% for the full year remains unchanged.

We continue to make progress on the optimised Escondida Growth Program. In September, the Antofagasta Environmental Evaluation Committee approved the DIA for the Laguna Seca Expansion, enabling early infrastructure development, while the Escondida New Concentrator DIA permit remains on track to be submitted in H2 FY26.

### Pampa Norte (Spence) 55.8 kt ₹7%

Spence production decreased 7% as expected, as a result of lower cathode production, in line with a planned decline in stacked feed grade due to an increase in the volume of transitional ore processed.

Production guidance for Spence remains unchanged at between 230 and 250 kt for FY26 with production expected to increase from Q2 FY26.

## Copper South Australia 72.6 kt ₹1%

Production was stable, driven by improved mine productivity at Olympic Dam and Prominent Hill, with strong smelter and refinery throughput, offsetting lower grade. We successfully completed planned major maintenance at Olympic Dam on the underground materials handling system, mills and the refinery, and continued the integration of HydroFloat technology at Carrapateena.

Production guidance for FY26 remains unchanged at between 310 and 340 kt, weighted to the second half

Gold production increased 24%, supported by strong operating performance and higher grades at Olympic Dam.

## Other copper

At Antamina, copper production decreased 7% to 34 kt. Zinc production was 86% higher at 36 kt, as a result of planned higher feed grades. FY26 copper production guidance of between 120 and 140 kt and zinc production guidance of between 90 and 110 kt remain unchanged.

Carajás produced 2.4 kt of copper and 1.8 troy koz of gold. As announced in August, the divestment of Carajás is expected to close in early CY26, subject to the satisfaction of customary closing conditions (including regulatory approvals).

### Iron ore

**Production** 

64 Mt **₽**1%

Q1 FY25 65 Mt

FY26e 258 - 269 Mt

Average realised price

US\$84.04/wmt +5%

**Q1 FY25** US\$80.10/wmt

Iron ore production decreased 1% to 64 Mt. Production guidance for FY26 remains unchanged at between 258 and 269 Mt.

### WAIO 62.0 Mt **\$**2% | 70.2 Mt (100% basis)

Production was solid as WAIO demonstrated continued supply chain excellence with record material mined (up 9%) and strong shipments, in a quarter of significant planned maintenance.

The major rebuild of Car Dumper 3 at Port Hedland, which had a 4.3 Mt (100% basis) volume impact, was safely completed ~8% ahead of schedule, demonstrating disciplined execution and project delivery excellence. Progress continued on the multi-year Rail Technology Program (RTP1), with tie-in activities advancing as scheduled — supporting long-term infrastructure uplift and future logistics resilience.

Production guidance for FY26 remains unchanged at between 251 and 262 Mt (284 and 296 Mt on a 100% basis).

Sales were broadly in line with the prior year, with a 5% increase in sales of higher-value lump. We sell and ship iron ore products via different commercial distribution channels, this includes seaborne sales, and portside sales in China which have increased over recent years in line with our strategy. We will continue to optimise distribution channels to support product placement.

### Samarco 2.1 Mt **1**64% | 4.1 Mt (100% basis)

Production increased following recommissioning of latent pelletising plant capacity and the ramp up of the second concentrator. Production guidance for FY26 remains unchanged at between 7 and 7.5 Mt with planned maintenance across the year.

# Coal

# Steelmaking coal

**Production** 

4.9 Mt +8%

Q1 FY25 4.5 Mt

FY26e 18 - 20 Mt

Average realised price

US\$180.67/t **₽**16%

Q1 FY25 US\$214.86/t

### BMA 4.9 Mt +8% | 9.7 Mt (100% basis)

Production increased 8% due to higher underground production rates at Broadmeadow and increased prime stripping, which offset the impact of planned higher strip ratios at our open cut operations.

Due to market conditions and the unsustainable impact of the Queensland Government's coal royalties on business returns, Saraji South, part of the Saraji mine complex, will be placed into a period of care and maintenance from November 2025.

Production guidance for FY26 remains unchanged at between 18 and 20 Mt (36 and 40 Mt on a 100% basis). Volumes will be weighted to H2 FY26, with continued safe management of geotechnical characteristics in the current longwall panel and a longwall move at Broadmeadow scheduled in Q2 FY26. We expect to continue building raw coal inventory into CY27, to further improve operating stability.

# **Energy coal**

**Production** 

**NSWEC 3.5 Mt 4**%

3.5 Mt **₽**4%

Q1 FY25 3.7 Mt

FY26e 14 - 16 Mt

throughput. Strong mining performance, with improved truck availability, resulted in a build of raw coal inventory.

Production decreased due to additional wash plant maintenance resulting in lower plant

Production guidance for FY26 remains unchanged at between 14 and 16 Mt.

In September 2025, we received the final approval from the Australian Federal Government to extend mining to 30 June 2030, following the NSW Government extension granted in April

2025.

Average realised price

US\$95.18/t **₽**23%

Q1 FY25 US\$124.32/t

# **Quarterly performance | Q1 FY26 v Q4 FY25**

#### Copper Iron ore

494 kt **4**4%

**Q4 FY25** 516 kt

Higher production at Escondida due to higher concentrator throughput, partially offset by lower production at Spence due to lower grades and Copper SA due to planned major maintenance.

64 Mt **+**9%

Q4 FY25 70 Mt

Lower production at WAIO as a result of planned maintenance including the rebuild of Car Dumper 3, which had a 4.3 Mt (100% basis) volume impact.

## Steelmaking coal

4.9 Mt **₹**5%

**Q4 FY25** 5.1 Mt

Lower production due to planned higher strip ratio as a result of mine sequencing. This was partially offset by increased prime stripping and inventory drawdown.

## **Energy coal**

3.5 Mt **₽**13%

Q4 FY25 4.1 Mt

Lower production due to planned annual wash plant maintenance and lower bypass coal.

# **Appendix 1**

Variance analysis relates to the relative performance of BHP and/or its operations during the three months ended September 2025 compared with the three months ended September 2024, unless otherwise noted. Production volumes, sales volumes and capital and exploration expenditure from subsidiaries are reported on a 100% basis; production and sales volumes from equity accounted investments and other operations are reported on a proportionate consolidation basis. Numbers presented may not add up precisely to the totals provided due to rounding. Medium term refers to a five-year time horizon, unless otherwise noted

The following abbreviations may have been used throughout this release: billion tonnes (Bt); cost and freight (CFR); cost, insurance and freight (CIF), carbon dioxide equivalent (CO2-e), Direct Reduced Iron (DRI), dry metric tonnes (dmt); free on board (FOB); giga litres (GL); greenhouse gas (GHG); grams per cubic centimetre (g/cm3), grams per tonne (g/t); high-potential injury (HPI); kilograms per tonne (kg/t); kilometre (km); million ounces per annum (Mozpa); metres (m), million pounds (MIb); million tonnes (Mt); million tonnes per annum (Mtpa); percentage point (ppt); ounces (oz); part per million (ppm), pounds (lb); thousand ounces (koz); thousand ounces per annum (kozpa); thousand tonnes (kt); thousand tonnes per annum (ktpa); thousand tonnes per day (ktpd); tonnes (t); total recordable injury frequency (TRIF); wet metric tonnes (wmt); and year to date (YTD).

In this release, the terms 'BHP', the 'Group', 'BHP Group', 'we', 'us', 'our' and 'ourselves' are used to refer to BHP Group Limited and, except where the context otherwise requires, our subsidiaries. Refer to Note 28 - Subsidiaries of the Financial Statements in BHP's 2025 Annual Report for a list of our significant subsidiaries. Those terms do not include non-operated assets. Notwithstanding that this release may include production, financial and other information from non-operated assets, non-operated assets are not included in the BHP Group and, as a result, statements regarding our operations, assets and values apply only to our operated assets unless stated otherwise. Our non-operated assets include Antamina, Resolution, Samarco and Vicuña. BHP Group cautions against undue reliance on any forward-looking statement or guidance in this release. These forward-looking statements are based on information available as at the date of this release and are not guarantees or predictions of future performance and involve known and unknown risks, uncertainties and other factors, many of which are beyond our control and which may cause actual results to differ materially from those expressed in the statements contained in this release.
