

# Employee Assistance Program

As a global organisation, we experience continual change. To assist you and your immediate family to deal with any issues that may be affecting your life or work, access free, confidential support through our Employee Assistance Programs. At BHP, we have one global EAP provider, Converge International, supported by ComPsych at all BHP locations outside of Australia.

Please select the relevant contact details for your location. The provider will ask for your name, company and where you are based (if you are a family member of a BHP employee, you'll be asked to provide their name, company and location). These details are also available at <https://info.convergeinternational.com.au/bhp>
