

## Know more about our Global Contract Management System (GCMS)

Beginning April 2018, BHP will be implementing a new Global Contract Management System (GCMS). Our GCMS platform will be used throughout BHP for the Source-to-Contract process, Supplier Lifecycle Management and Contract Lifecycle Management. This change will enable greater collaboration between BHP and our valued suppliers and partners.

For an introduction to GCMS, please [click here](#) to watch the video. If you have received an email requesting to register your organization in GCMS, please [click here](#) to refer to the '**BHP GCMS Supplier Guide**'. These will help you to transition to our new platform smoothly. Both the video and supplier guide can be found on [www.bhp.com](http://www.bhp.com)

Please note that access to GCMS is by invitation from BHP Procurement. Throughout 2018, email invitations will be sent to suppliers with an aim to have all suppliers registered on GCMS as soon as practically possible. We greatly appreciate your patience throughout this process.

Please note that this change **will not** impact any other BHP systems (for example, Ariba, ProCon, Open Windows). All other systems will continue to operate as normal.

We look forward to improving the way we collaborate and create shared value with our suppliers and partners by embracing a new way of working.

For any questions or clarifications, please approach your BHP Supply point of contact.
