This Summary Review is designed to provide an update on the operations and performance of BHP Billiton during the year ended 30 June 2014 in a concise and easy-to-read format. It is not a summary financial statement or our Strategic Report 2014 for the purposes of the UK Companies Act 2006. The Strategic Report 2014 is contained within the Annual Report 2014 and is available from the BHP Billiton website at www.bhpbilliton.com.

This Summary Review is not intended to provide a guide as to the likely future performance of the Group. Certain statements may be forward-looking statements, which are based on current expectations, beliefs and assumptions regarding present and future business strategies and environments in which the Group will operate in the future. Such expectations, beliefs and assumptions may or may not prove to be correct and are subject to a number of known and unknown risks and uncertainties that could cause actual results, performance and achievements to differ materially. The Annual Report 2014 sets out certain risk factors that may cause our results to be materially less favourable than those implied by these forward-looking statements, including, for example, fluctuations in commodity prices and currency exchange rates, demand and supply changes in major markets and government regulations. Past performance cannot be relied on as a guide to future performance.

Nothing in this Summary Review should be construed as either an offer to sell or the solicitation of an offer to buy or sell BHP Billiton securities or any other securities in any jurisdiction, or be treated or relied upon as a recommendation or advice by BHP Billiton.

This Summary Review is not a substitute for our Annual Report 2014 or Strategic Report 2014, and does not contain all the information needed to give as full an understanding of the Group’s performance, financial position and future prospects as is provided by the Annual Report 2014, and is available from the BHP Billiton website at www.bhpbilliton.com. Printed copies of the Annual Report 2014 will be distributed to all shareholders who elected to receive them, and can be requested by contacting the relevant Share Registrar or Transfer Office.

BHP Billiton Limited. ABN 49 004 028 077. Registered in Australia.
Registered office: 171 Collins Street, Melbourne, Victoria 3000, Australia.

BHP Billiton Plc. Registration number 3196209. Registered in England and Wales. Registered office: Neathouse Place, London SW1V 1LH, United Kingdom.

BHP Billiton Limited and BHP Billiton Plc are members of the BHP Billiton Group, which is headquartered in Melbourne, Australia.
We are proud that the supply of our products supports global economic growth and development, which leads to reductions in poverty and improvement in living standards.
Our Charter

We are BHP Billiton, a leading global resources company. Our purpose is to create long-term shareholder value through the discovery, acquisition, development and marketing of natural resources.

Our strategy is to own and operate large, long-life, low-cost, expandable, upstream assets diversified by commodity, geography and market.

Our Values
Sustainability
Putting health and safety first, being environmentally responsible and supporting our communities.

Integrity
Doing what is right and doing what we say we will do.

Respect
Embracing openness, trust, teamwork, diversity and relationships that are mutually beneficial.

Performance
Achieving superior business results by stretching our capabilities.

Simplicity
Focusing our efforts on the things that matter most.

Accountability
Defining and accepting responsibility and delivering on our commitments.

We are successful when:
Our people start each day with a sense of purpose and end the day with a sense of accomplishment.
Our communities, customers and suppliers value their relationships with us.
Our asset portfolio is world-class and sustainably developed.
Our operational discipline and financial strength enables our future growth.
Our shareholders receive a superior return on their investment.

Andrew Mackenzie
Chief Executive Officer

BHP Billiton is a Dual Listed Company comprising BHP Billiton Limited and BHP Billiton Plc. The two entities continue to exist as separate companies but operate as a combined Group known as BHP Billiton.

The headquarters of BHP Billiton Limited and the global headquarters of the combined BHP Billiton Group are located in Melbourne, Australia. BHP Billiton Plc is located in London, United Kingdom. Both companies have identical Boards of Directors and are run by a unified management team. Throughout this publication, the Boards are referred to collectively as the Board. Shareholders in each company have equivalent economic and voting rights in the BHP Billiton Group as a whole.

Throughout this Summary Review 2014, the terms BHP Billiton, the Company and the Group refer to the combined group, including both BHP Billiton Limited and subsidiary companies and BHP Billiton Plc and subsidiary companies.
Our results at a glance

US$179 billion  Market capitalisation as at 30 June 2014.

US$67.2 billion  Revenue increased by two per cent.

US$25.4 billion  Net operating cash flow increased by 26 per cent.

121 US cents  Total dividend per share, an increase of four per cent.

Underlying EBIT  US$22.9 billion

Underlying attributable profit  US$13.4 billion

Dividends determined  US$6.4 billion

Community investment  US$241.7 million

(a) Underlying attributable profit, Underlying EBIT and Underlying EBITDA are used to reflect the underlying performance of BHP Billiton. Underlying attributable profit is Attributable profit excluding any exceptional items. Underlying EBIT is earnings before net finance costs, taxation and any exceptional items. Underlying EBITDA is Underlying EBIT before depreciation, impairments and amortisation. We believe that Underlying attributable profit, Underlying EBIT and Underlying EBITDA provide useful information, but should not be considered as an indication of, or as an alternative to, Attributable profit as an indicator of actual operating performance or as an alternative to cash flow as a measure of liquidity. Underlying EBIT and Underlying EBITDA are included in the FY2014 Consolidated Financial Statements as required by IFRS 8 ‘Operating Segments’.
(b) Net operating cash flows are after net interest and taxation.
(c) Represents the dividend determined for each BHP Billiton Plc and BHP Billiton Limited share.
(d) Gearing is the ratio of net debt to net debt plus net assets.
(e) FY2011 and FY2010 data has not been restated for the effects of new accounting standards and interpretations and other voluntary changes in accounting policy, which are effective in the financial year commencing from 1 July 2013.

A full description of our Group’s performance, financial position, future prospects and reserves and resources is available in the Annual Report 2014, which is available from the BHP Billiton website at www.bhp.com.

A summary of financial information is available on page 44 of this Summary Review 2014.
Dear Shareholder

I am pleased to report that your Company delivered strong performance this past financial year. BHP Billiton reported an Attributable profit of US$13.8 billion and Net operating cash flow of US$25.4 billion. These strong results were underpinned by increased production and productivity-led cost efficiencies.

Our balance sheet remains strong and we have maintained our solid ‘A’ credit rating. The full-year progressive base dividend was increased by 4.3 per cent to 121 US cents per share. At the same time, the Company has continued to invest in high-return growth options within the existing portfolio.

Markets for our commodities have been affected by the mixed global economic environment, with solid but moderately slower Chinese growth, underlyng momentum in the United States and some positive signs in Japan, while the European Union has remained weak. Overall, demand for our commodities continues to be strong, underpinning the long-term outlook for our portfolio of products.

We continuously review our strategy against changes in the external environment, including climate change. We consider various scenarios and the risks and opportunities facing the natural resources sector and seek to optimise the investments we make on behalf of shareholders.

Our position on climate change is clear. Sustainable growth requires an effective response to climate change. We accept the Intergovernmental Panel on Climate Change’s assessment that warming of the climate is unequivocal, the human influence is clear and the physical impacts are avoidable. We believe that the Board’s approach to strategy, investment decision-making and portfolio management, as well as the diversity of our overall portfolio, positions us to manage and respond to changes and capture opportunities to grow shareholder value over time. We believe that the resilience of our portfolio under a range of climate change scenarios is underpinned by its diversity and by the relatively short pay-back periods for most of our present and future investments in fossil fuels production. BHP Billiton is committed to reducing greenhouse gas emissions in its own operations, to actively participating in the development and deployment of low-emissions technologies and to being a leader in our sector on climate change action and advocacy.

Next year marks the 130th anniversary of the founding and stock exchange listing of The Broken Hill Proprietary Company Limited. Over these years the Company has reshaped its business to maintain its industry leadership. We moved from mining silver, lead and zinc at Broken Hill, to producing steel, and then to petroleum in Bass Strait, iron ore in the Pilbara, metallurgical coal in the Bowen Basin and copper in the Andes.

For the past 10 years we have also been simplifying our portfolio and looking at ways to make your Company simpler and more productive. In the last two years alone we have sold US$6.7 billion of assets at attractive prices. This year, we have proposed another step in our evolution with the demerger of selected aluminium, coal, manganese, nickel and silver assets. This proposed demerger will allow BHP Billiton to improve the productivity of our largest businesses more quickly and create a new global metals and mining company specifically designed to enhance the performance of the demerged assets. All BHP Billiton shareholders would retain their existing shares in BHP Billiton and receive shares in the new company pro rata with your BHP Billiton shareholding. Following the demerger, BHP Billiton would seek to steadily increase or at least maintain its dividend per share in US dollar terms – implying a higher payout ratio. Subject to final Board approval to proceed, shareholder approval and the receipt of satisfactory third party approvals, the demerger is expected to be completed in the first half of the 2015 calendar year.

Against the backdrop of external and organisational change, we continue to be guided by Our BHP Billiton Charter, which defines our values. Our first Charter value is Sustainability and we maintain a relentless focus on the health and safety of our people and the communities in which we operate. This year, we reported a record low total recordable injury frequency and no fatalities at our operated assets during the period. While this is an encouraging result, our efforts to protect the health and safety of our people will be unrelenting.

We are committed to making a positive contribution to the communities where we live and conduct our business. This year, we contributed one per cent of pre-tax profit, investing US$242 million across a wide range of programs and activities to support our communities. These funds support local programs, such as the LEAD project which seeks to improve the lives of smallholder farmers in the rural Maputo Province of Mozambique; an innovative education program in Pakistan that has seen 800 children graduate from the program with another 2,000 currently studying in 13 model schools; the ANDA project which addresses the needs of people displaced by conflict and vulnerable communities in the Cordoba District of Colombia to complement poverty reduction efforts by the national government; and Bush Blitz, a unique species discovery program in Australia.

Our community programs are in addition to the US$9.9 billion in taxes and royalties we paid to governments and our broader economic contribution in terms of jobs, capital investment and support of local businesses.

I would like to take this opportunity to acknowledge David Crawford who will retire from the BHP Billiton Board in November 2014. David has served with distinction on the board of BHP and BHP Billiton for 20 years. In announcing our plans to create an independent global metals and mining company we said that David would become the new company’s inaugural chairman. His skills and experience make David the right person to guide the new company through its entry into the global resources sector.

In line with our planned approach to Board succession, we have appointed Malcolm Brinded to the Board as a Non-executive Director and member of the Sustainability Committee. Malcolm’s deep experience in energy, governance and sustainability will make a significant contribution to the Board.

In summary, a strong management team and over 123,000 talented employees and contractors in 21 countries have improved safety, increased production and delivered more value for shareholders and all our stakeholders. Your Company does make a positive difference. BHP Billiton helps lift living standards for people around the world and we work hard to add value to the communities, regions and countries where we live and do business.

Jac Nasser AO
Chairman
Chief Executive Officer’s Report

I am pleased to report that BHP Billiton delivered a strong set of financial results in FY2014, with improvements in operating performance and safety supported by a continued focus on productivity. This performance was achieved against a background of improving economic conditions in the United States, Japan and the European Union, solid but slower Chinese economic growth and a decline in key commodity prices in a highly competitive global marketplace.

In a year of record production we had no fatalities at our operated assets and improved our total recordable injury frequency performance by nine per cent to 4.2 injuries per million hours worked. While we are encouraged to have recorded a year without fatalities, we must never rest on past performance. We will continue to relentlessly identify and manage material health and safety risks to protect our people and communities.

Annual production records were achieved at 12 of our operations and across four commodities. Western Australia Iron Ore and Queensland Coal both increased annual production volume by more than 20 per cent as we delivered more tonnes from existing infrastructure and growth projects ahead of schedule. These results were supported by our Onshore US petroleum asset delivering a 73 per cent increase in petroleum liquids production.

Our safety performance improves through our continued focus on accelerating sustainable improvements in productivity by finding more efficient and effective ways of performing day-to-day operations. We delivered more than US$6.6 billion of sustainable productivity-led gains over the last two years. There are more achievements in productivity still to come as our teams continue to innovate and learn from each other, replicating best practice and operating on a common data platform across the organisation.

We continue to invest selectively in those projects that meet our demanding criteria. In FY2014, we reduced our share of exploration and capital expenditure by 32 per cent to US$15.2 billion and expect this to decline to US$14.8 billion in FY2015. This approach has increased internal competition for capital, improved our capital efficiency and provides for long-term, sustainable shareholder value.

In August 2014, we announced a proposal to create an independent global metals and mining company based on a selection of BHP Billiton’s high-quality aluminium, coal, manganese, nickel and silver assets. Separating these assets via a demerger has the potential to unlock shareholder value by significantly simplifying the BHP Billiton Group and creating two portfolios of complementary assets. Once simplified, BHP Billiton would be almost exclusively focused on our large, long-life iron ore, copper, coal, petroleum and potash basins. With fewer assets and a greater upstream focus, BHP Billiton would be able to reduce costs and improve the productivity of our largest businesses more quickly. The proposed demerger remains subject to the receipt of satisfactory third party approvals, final Board approval and shareholder vote.

In addition to our work to simplify BHP Billiton’s portfolio, we continue to support the communities where we operate. We support local economies through employment, infrastructure development, taxes and royalties, as well as purchasing local goods and services. We are part of these communities and we strive to be a positive and active participant in community life.

In FY2014, our voluntary community investment amounted to US$242 million.

We are proud that the supply of our products supports global economic growth and development, with the associated reduction in poverty and improvement in living standards. Continued global development depends on access to affordable energy and other critical resources.

Sustainable growth requires an effective response to climate change. We accept the Intergovernmental Panel on Climate Change’s assessment that warming of the climate is unequivocal, the human influence is clear, and physical impacts are unavoidable. We are taking action by focusing on reducing our emissions, increasing our preparedness for physical climate impacts and working with others, including industry and governments, to support effective responses to climate change. We will, through material investments in low-emissions technology, contribute to reducing emissions from fossil fuels. We view climate change as a critical element in our approach to risk management across our business.

In everything we do, we are guided by Our BHP Billiton Charter values of Sustainability, Integrity, Respect, Performance, Simplicity and Accountability. These are the foundation of who we are, and how we perform our role as an active and engaged corporate citizen. I am honoured to be part of a company where we live our values every day.

Finally, I would like to thank all our suppliers, customers, host communities and shareholders for their continued support over the past year as we strive to be a valued partner of choice. I would especially like to thank our employees and contractors whose commitment and contribution is the cornerstone of the success of this Company.

Andrew Mackenzie
Chief Executive Officer
Andrew Mackenzie
BSc (Geology), PhD (Chemistry), 57
Chief Executive Officer and Executive Director
Chairman of the Group Management Committee
Andrew Mackenzie commenced as Chief Executive Officer in May 2013. Mr Mackenzie joined BHP Billiton in November 2008 as Chief Executive Non-Ferrous. Prior to BHP Billiton, he worked at Rio Tinto, where he was Chief Executive of Diamonds and Minerals, and BP, where he held a number of senior roles, including Group Vice President for Technology and Engineering and Group Vice President for Chemicals. In July 2014 he was elected a Fellow of the Royal Society.

Peter Beaven
BAcc, CA, 47
President, Copper
Peter Beaven was appointed President, Copper in May 2013. Previously Mr Beaven was the President of Base Metals and prior to that appointment in November 2010, President of BHP Billiton’s Manganese business, and Vice President and Chief Development Officer for Carbon Steel Materials. He has wide experience across a range of regions and businesses in BHP Billiton, UBS Warburg, Kleinwort Benson and PricewaterhouseCoopers. Mr Beaven will be appointed as Chief Financial Officer, effective 1 October 2014.

Tony Cudmore
BA (Politics and Economics), 45
President, Corporate Affairs (since 3 March 2014)
Tony Cudmore joined BHP Billiton as President, Corporate Affairs in March 2014. Prior to BHP Billiton, Mr Cudmore worked with ExxonMobil for 13 years and held a wide range of senior and global corporate affairs roles in Australia and the United States. Before joining ExxonMobil, he was a Media Relations and Policy Adviser before becoming Principal Adviser to then Premier of Victoria, The Hon Jeff Kennett MP, followed by his role as Assistant Director of the Australian Institute of Petroleum.

Tim Cutt
BSc, 54
President, Petroleum and Potash (since 2 July 2013)
Tim Cutt was appointed President, Petroleum and Potash in July 2013. Mr Cutt joined BHP Billiton in 2007 as the President of the Production Division in the Petroleum business. He was appointed to the position of President, Diamonds and Specialty Products in 2011. Before joining BHP Billiton, he had a successful 24-year career with ExxonMobil in roles of significant oil and gas responsibility, including President of ExxonMobil de Venezuela and President of Hibernia Management and Development Company.

Dean Dalla Valle
MBA, 55
President, Coal
Dean Dalla Valle was appointed President, Coal in May 2013. Mr Dalla Valle has 37 years’ experience in BHP Billiton. He was previously the President of the Uranium business for three years and prior to that held the positions of Asset President, Olympic Dam, Asset President, Cannington silver mine and Vice President, Ports, Iron Ore. He was also the General Manager of the Appin, Tower and West Cliff Collieries for Illawarra Coal.

Mike Fraser
BCom, MBL, 49
President, Human Resources (since 27 August 2013)
Mike Fraser joined BHP Billiton in January 2000. Mr Fraser joined the Group Management Committee in August 2013 as President, Human Resources. He was previously Head of Group Human Resources. Before becoming Head of Human Resources, Mr Fraser was Asset President, Mozal, based in Mozambique. His previous roles with the Company included Human Resources Vice President for the Aluminium and Energy Coal businesses.
Geoff Healy joined BHP Billiton as Chief Legal Counsel in June 2013. Prior to BHP Billiton, Mr Healy was a partner at Herbert Smith Freehills for 16 years, and a member of its Global Partnership Council. His core field of expertise is complex corporate and regulatory advisory work, risk management, investigations and disputes.

Mike Henry joined BHP Billiton in 2003 and has served as President, HSE, Marketing and Technology since May 2013. Prior to this, he was Chief Marketing Officer. Mr Henry’s earlier career with BHP Billiton included various business development and marketing roles, including Marketing Director for Petroleum, Marketing Director for Energy Coal & Freight and Vice President, Business Development for the Energy Coal business. Prior to joining BHP Billiton, he worked for Mitsubishi Corporation where he held a number of commercial roles.

Graham Kerr joined BHP Billiton in 1994 and was appointed Chief Financial Officer in November 2011. Prior to this, Mr Kerr was President of Diamonds and Specialty Products. He has worked in a wide range of finance, treasury and operational roles across the Group, and has held the positions of Chief Financial Officer of Stainless Steel Materials, Vice President, Finance – BHP Billiton Diamonds and Finance Director for the EKATI diamond mine. In 2004, he left BHP Billiton for a two-year period when he was General Manager Commercial for Iluka Resources Ltd. In August 2014, Mr Kerr was appointed as Chief Executive Officer-designate of the new company that BHP Billiton plans to form in the proposed demerger. Mr Kerr will retire from the Group Management Committee and as Chief Financial Officer of BHP Billiton on 1 October 2014.

Jane McAloon was appointed to the Group Management Committee as President, Governance and Group Company Secretary in May 2013, after serving as Group Company Secretary since July 2007 and Company Secretary for BHP Billiton Limited since September 2006. Prior to joining BHP Billiton, she held the position of Company Secretary, Group Manager External and Regulatory Services in the Australian Gas Light Company, held various Australian State and Commonwealth government positions and also worked in private legal practice. She is a Fellow of the Governance Institute of Australia and Fellow of Australian Institute of Company Directors.

Daniel Malchuk was appointed President, Aluminium, Manganese and Nickel in May 2013. Previously Mr Malchuk was the President of Minerals Exploration, a position he held from July 2012. He worked for the Group between 1996 and 1998 in BHP Copper in the United States and has held a number of roles in the Base Metals business since he rejoined BHP Billiton in 2002. In 2006 he took the role of Asset Leader, Joint Ventures and a year later was appointed Vice President, Strategy and Development in Base Metals.

Jimmy Wilson was appointed President, Iron Ore in March 2012. Mr Wilson has had an extensive career in the mining industry and held key managerial and operational roles throughout BHP Billiton including President, Energy Coal (2009–2012) and President, Stainless Steel Materials (2007–2009). Prior to these roles, he was President and Chief Operating Officer, Nickel West, President and Chief Operating Officer, Samancor Chrome and General Manager of Billiton’s Bayside Aluminium.

Karen Wood joined BHP Billiton in 2001. Her previous positions were President Corporate Affairs, Chief People Officer, Chief Governance Officer, Special Adviser and Head of Group Secretariat and Group Company Secretary. Prior to her retirement from the Group Management Committee, she provided advice to the Chief Executive Officer and worked on a range of significant corporate and Board issues. Ms Wood retired from BHP Billiton on 20 August 2014 and will continue to provide advice and assistance, on an ongoing consultancy basis, to the Chief Executive Officer and Board of Directors on several matters including the proposed demerger. Before joining BHP Billiton, she was General Counsel and Company Secretary for Bonlac Foods Limited.

Ms Wood joined BHP Billiton in 2001. Her previous positions were President Corporate Affairs, Chief People Officer, Chief Governance Officer, Special Adviser and Head of Group Secretariat and Group Company Secretary. Prior to her retirement from the Group Management Committee, she provided advice to the Chief Executive Officer and worked on a range of significant corporate and Board issues. Ms Wood retired from BHP Billiton on 20 August 2014 and will continue to provide advice and assistance, on an ongoing consultancy basis, to the Chief Executive Officer and Board of Directors on several matters including the proposed demerger. Before joining BHP Billiton, she was General Counsel and Company Secretary for Bonlac Foods Limited.
Our strategy

Execution of our consistent strategy has delivered long-term sustainable value.

Our Charter
Our BHP Billiton Charter is the single most important means by which we communicate who we are, what we do and what we stand for. It is through Our Charter that we articulate our purpose, our strategy, the values we uphold and how we measure success. Our Charter is the foundation for our decision-making, actions and behaviours.

Our consistent strategy
Our long-term strategy is to own and operate large, low-cost, expandable, upstream assets diversified by commodity, geography and market.

Our portfolio of high-quality growth opportunities positions BHP Billiton to continue to meet the changing needs of our customers and the resources demands of emerging and developed economies at every stage of their growth.

We extract and process minerals, oil and gas from our production operations, located primarily in Australia, the Americas and southern Africa. We sell our products globally, with sales and marketing taking place principally through Singapore and Houston, United States.

We operate in a dynamic external environment and this strategy has delivered strong company performance over time which, in turn, underpins the creation of long-term sustainable value for our shareholders, customers, employees and the communities in which we operate. We aim to deliver long-term sustainable value rather than focusing on short-term returns.

In pursuing our strategy through all stages of the economic and commodity cycle, we are guided by Our Charter values of Sustainability, Integrity, Respect, Performance, Simplicity, and Accountability.

Strategic context
We are BHP Billiton, a leading diversified resources company. We are among the world’s top producers of major commodities, including iron ore, metallurgical and energy coal, conventional and unconventional oil and gas, copper, aluminium, manganese, uranium, nickel and silver.

The mineral and energy commodities we produce are crucial at all stages of economic development. Emerging economies require construction material like steel as their populations expand and new cities and heavy industry develop. As economies grow and people become wealthier, a consumer economy emerges and steel intensity slows, while demand increases for materials that are used in consumer goods, such as copper. Agricultural demand increases steadily with income.

Access to energy underpins economic development. The most rapid demand growth comes at the earliest stages when people first gain access to modern energy supplies. In the next 20 years, we expect 1.7 billion people to gain access to electricity for the first time. Reliable and affordable energy supports the development of industry and as incomes rise, more people can buy consumer goods, like cars and appliances, further increasing the demand for energy.

We are proud that the supply of our products supports global economic growth and development, with the associated reduction in poverty and improvement in living standards. Continued global development depends on access to affordable energy and other critical resources.

Demand for energy is widely expected to increase by more than 30 per cent in the next 20 years, with two thirds of new demand originating from Asia and half from China and India. Africa is expected to see the fastest growth, albeit from a lower base. The way these regions meet their energy needs will significantly influence commodity demand.

Every nation will choose a different mix of energy sources, which balances affordability and security of supply. The Intergovernmental Panel on Climate Change (IPCC), the International Energy Agency and others believe that over the next few decades, fossil fuels will remain central to the energy mix as their affordability and the scale of existing infrastructure make them hard to practically replace, although their exact percentage varies across a range of scenarios.
Our strategy is tied to economic growth in both emerging and developed economies. Sustainable growth requires an effective response to climate change. BHP Billiton accepts the IPCC’s assessment of climate change science, which has found that warming of the climate is unequivocal, the human influence is clear and physical impacts are unavoidable. Limiting climate change will require substantial and sustained reductions of greenhouse gas (GHG) emissions.

We believe that the world must pursue the twin objectives of limiting climate change to the lower end of the IPCC emission scenarios, in line with current international agreements, while providing access to the affordable energy required to continue the economic growth essential for maintaining living standards and alleviating poverty.

The global challenge of climate change remains a priority for us. Our approach to investment decision-making and portfolio management and the diversity of our overall portfolio, positions us not only to manage and respond to changes, but also to capture opportunities to grow shareholder value over time. We are taking action by focusing on reducing our emissions, increasing our preparedness for physical climate impacts and accelerating our work with others, including industry and governments, to support effective responses to climate change. We support development of a long-term policy framework that uses a portfolio of complementary measures, including a price on carbon that addresses competitiveness concerns, support for energy efficiency and low emissions technologies, and measures to build resilience. A price on carbon is an effective measure to drive greenhouse gas emission reductions and technological innovation. To effectively address the challenge of climate change, there must be a significant focus on developing and deploying low-emissions technologies. We will, through material investments in low-emissions technology, contribute to reducing emissions from fossil fuels.

Scenario analysis

The corporate planning process is underpinned by scenarios encompassing a wide spectrum of potential end states for key global uncertainties (economic, geopolitical, geoeconomic, environmental and technological). These scenarios are designed to interpret technical, economic, political and global governance trends facing the resources industry. Each scenario has been defined as a distinct potential world in 2035, the scenarios are internally consistent and plausible, but also divergent by design.

Alongside scenarios, associated signposts and triggers have been developed. These are leading indicators that highlight the likely emergence of one scenario or another, and they are also useful during the annual process of updating and refreshing of the scenarios.

The diversity of our overall portfolio and our approach to investment decision-making and portfolio management positions us to manage and respond to change to reduce risk, while also capturing opportunities to grow shareholder value over time.

Strategic priorities

Our Group Management Committee maintains a strong focus on the following strategic priorities in order to execute the Company’s strategy.

Sustainability

Our overriding commitment is to ensuring the safety and health of our people, being environmentally responsible and supporting the communities in which we operate. This commitment informs everything we do and influences every aspect of our work.

As energy demand continues to increase, the global challenge of climate change remains a critical element in informing the Company’s strategic priorities.

Create a more productive organisation

We are dedicated to working smarter to safely deliver greater volume growth from existing equipment at lower unit cost and empowering our people to find new ways of solving old problems. We embedded productivity-led gains, volume and cost efficiencies of US$2.9 billion, exceeding our own target by 61 per cent or US$1.1 billion. This means we have now delivered more than US$6.6 billion of sustainable productivity-led gains over the last two years.

Create a more productive organisation

More information about our productivity is available on page 28 of this Summary Review 2014.

Simplification of our portfolio

We are concentrating our efforts on those world-class basins where we enjoy economies of scale and a competitive advantage. Our focus on four major Businesses of Petroleum and Potash, Copper, Iron Ore and Coal provides strong diversification.

To accelerate portfolio simplification, on 19 August 2014 we announced a plan to demerge a selection of BHP Billiton’s high-quality aluminium, coal, manganese, nickel and silver assets to create an independent global metals and mining company.

More information on the planned demerger is available on page 29 of this Summary Review 2014.

Disciplined approach to capital management

We have reduced capital and exploration expenditure by 32 per cent and maintained our solid ‘A’ credit rating. Our balance sheet remains strong and we have reduced our net debt position to US$25.8 billion. The full-year dividend increased by four per cent to 121 US cents per share.

A full description of our Company’s performance, financial position and future prospects is provided in our Annual Report 2014, which is available from the BHP Billiton website at www.bhp.com.
Improvement

Performance

Achieving superior business results by stretching our capabilities.

We delivered a strong operating and financial performance in FY2014. Our focus on productivity has resulted in a significant improvement in performance at our major Businesses this year, with a nine per cent increase in Group production and record output at 12 operations and across four commodities.

- **US$13.4 billion** underlying attributable profit
- **121 US cents** total dividend per share
- **9 per cent increase** production increased on a copper equivalent basis
Continued improvement in operating performance

The Company's focus on productivity has delivered improvements in performance at our major Businesses.

We have delivered on our commitments in the last 12 months. Our operational performance continued to improve, enabling us to exceed production guidance for a number of our core commodities, including iron ore, metallurgical coal and petroleum liquids. Group production increased by nine per cent in FY2014, with production records achieved at 12 operations and across four commodities.

A significant improvement in productivity underpinned strong financial performance as Underlying attributable profit increased by 10 per cent to US$13.4 billion. We embedded productivity-led gains, volume and cost efficiencies of US$2.9 billion, exceeding our target by 61 per cent or US$1.1 billion. This means we have now delivered more than US$6.6 billion of sustainable productivity-led gains over the last two years. By further improving productivity and reducing our share of capital and exploration expenditure by 32 per cent to US$15.2 billion, we delivered a substantial US$8.1 billion increase in free cash flow, despite weaker commodity prices. As a result, our balance sheet continued to strengthen and we finished the period with net debt of US$25.8 billion.

We have announced plans to create an independent global metals and mining company via a demerger, based on a selection of high-quality aluminium, coal, manganese, nickel and silver assets. Separating these assets via a demerger has the potential to unlock shareholder value by allowing BHP Billiton to improve the productivity of our largest Businesses more quickly and by creating a new company specifically designed to enhance the performance of its assets. With a simpler portfolio, we are targeting at least another US$3.5 billion of productivity-related gains by the end of FY2017.

Our Iron Ore Business clearly illustrates this opportunity. At Western Australia Iron Ore (WAIO), we now expect the debottlenecking of our mines and inner harbour infrastructure to increase our supply chain capacity to 290 million tonnes per annum (Mtpta) (100 per cent basis). The additional 65 Mtpta of capacity is likely to have a capital intensity below US$50 per annual tonne, with the improvement in productivity and economics of scale also expected to significantly reduce unit costs.

Our share of capital and exploration expenditure is expected to decline to approximately US$14.8 billion in FY2015, and should the proposed demerger be implemented, our investment ceiling will decrease to US$14 billion beyond FY2015. By maintaining an internal focus and concentrating investment in our major basins, we believe an average rate of return of greater than 20 per cent is achievable for our favoured development options.

With robust volume growth and further productivity gains expected, we remain confident in the outlook for the Group. On this basis, we increased our full-year progressive base dividend by four per cent to 121 US cents per share for an Underlying payout ratio of 48 per cent. We will seek to steadily increase or at least maintain the dividend per share in US dollar terms at each half-yearly payment following the demerger, implying a higher payout ratio.

The pace at which our balance sheet strengthens will also depend on external factors, such as commodity prices and foreign exchange rates. As in the past, we will return excess cash to shareholders in the most efficient way. By ensuring that we start from a position of strength, we will be well placed to implement an enduring program that can be managed in a more consistent and predictable manner.

Marketing
Marketing manages the Group’s product sales and the purchase of all major raw materials. Our objectives are to market all of our products, achieve at or better than prevailing market prices at the time of delivery, and cost efficiently manage our credit and price risks. Marketing also manages the supply chain of our products from assets to markets and the raw materials from suppliers to assets. This includes managing our in-house freight requirements so as to procure safe, high-quality, sustainable and cost-effective shipping.

The Marketing structure has been aligned to the Group’s respective Businesses. In order to develop customer and market-focused solutions, the primary hub for our marketing activities is Singapore, while our marketing of oil and gas is headquartered in Houston, United States. In addition, we have marketers located close to our customers in 14 cities across the world.

FY2014 saw an overall increase in most commodity sales volumes as a result of strong production performance, most notably in our Iron Ore, Petroleum and Coal Businesses. The Marketing team successfully navigated the risks posed by the changing external environment, while continuing to support our operating assets by moving all of our production to market. Marketing continues to strengthen relationships with all our external stakeholders through a range of engagement efforts.

Markets for our commodities were affected by growing momentum in the United States and Japanese economies, solid but slower Chinese growth, and slightly improved European Union economic growth. Increasing supply was the primary driver of some of our key commodity prices, which generally ended the year lower. Increased seasonal demand in the United States, coupled with lower supply growth, supported natural gas markets while solid steel production rates in Asia ensured demand for steel-related raw materials continued to grow.

Looking ahead, we expect restructuring of the Chinese economy towards consumer-oriented growth and successful responses to long-term challenges such as fiscal sustainability within the major developed economies will support sustained global growth. The Chinese economy will see a gradual shift in the types of goods and services it generates.

Over the long term, we maintain a positive outlook on Asian region commodity demand as economic development continues and influences levels and patterns of growth. The development in South Asia will provide support to long-term demand for steelmaking raw materials.
Petroleum and Potash

**RESULTS**

Petroleum production increased by four per cent; in August 2013, we announced an additional investment of US$2.6 billion in the Jansen Potash Project.

<table>

</tbody>
</table>

Total petroleum production increased by four per cent in FY2014 to 246 million barrels of oil equivalent (MMboe). A 16 MMboe increase in liquids production was underpinned by a 73 per cent increase in Onshore US liquids volumes and a near doubling of production at Atlantis. Natural gas volumes declined by four per cent as the delivery of first gas from Macedon partially offset lower demand at Bass Strait and natural field decline at Haynesville. Petroleum production is forecast to increase by five per cent (excluding divested assets) in FY2015 to 255 MMboe, with another 16 MMboe increase in total liquids production projected. Conventional volumes for FY2015 are forecast to remain broadly unchanged.

Underlying EBIT for Petroleum decreased by US$115 million to US$5.9 billion in FY2014. The average realised price of natural gas across our portfolio increased by 16 per cent to US$4.35 per thousand standard cubic feet (Mscf) and was the major contributor to the US$113 million price-related increase in Underlying EBIT during the period, net of price-linked costs. Volumes contributed an additional US$994 million to Underlying EBIT, although this was partially offset by an increase in depreciation and amortisation expense at Onshore US that reflected the ramp-up of liquids production and the progressive development of our Permian acreage.

In FY2014, approximately 75 per cent of Onshore US drilling and development expenditure of US$4.2 billion was invested in the Eagle Ford area, with the majority focused on our Black Hawk acreage. The repetitive, manufacturing-like nature of shale development is ideally suited to our productivity agenda and we are delivering strong results.

Of the 24 operated drilling rigs in action at the end of the period (30 June 2013: 40), 17 were in the Eagle Ford area (30 June 2013: 31), four were in the Permian area (30 June 2013: four) and three were in the Haynesville area (30 June 2013: four). There were no rigs in the Fayetteville area (30 June 2013: one).

Petroleum capital expenditure of approximately US$5.6 billion is planned in FY2015. Petroleum exploration expenditure for FY2014 was US$600 million, of which US$369 million was expensed.

During the period, we completed the divestment of our 46.1 per cent interest in Liverpool Bay and our South Midland acreage in the Permian basin, Onshore US. Combined proceeds of US$182 million were realised (before customary adjustments) and a gain on sale of US$116 million was recognised in Underlying EBIT.

Potash recorded an Underlying EBIT loss of US$583 million. This included a US$68 million impairment associated with our decision to allow the exclusivity agreement for Terminal 5 at the Port of Vancouver (United States) to lapse; and a US$300 million charge related to the revision of mine site rehabilitation provisions for the Group’s North American closed mines, which are managed by our Potash business. In addition, exploration expense in FY2014 was US$47 million, a US$42 million reduction from FY2013.

On 20 August 2013, we announced an additional investment of US$2.6 billion to finish the excavation and lining of the Jansen Potash Project production and service shafts, and to continue the installation of essential surface infrastructure and utilities. The overall project was 30 per cent complete at the end of the period with significant progress made on surface infrastructure and shaft excavation continuing.
### Copper

**RESULTS**

Copper production increased by two per cent and unit cash costs declined by six per cent.

</tbody>
</table>

Total copper production increased by two per cent in FY2014 to 1.7 million tonnes (Mt), as planned. Escondida copper production increased by two per cent to 1.2 Mt as an improvement in mill throughput and concentrator utilisation offset declining ore grades. Record mining rates at Olympic Dam underpinned an 11 per cent increase in copper production to 184 kilotonnes (kt) while Pampa Norte copper production of 233 kt was unchanged from the prior period. Antamina achieved record annual mill throughput and copper production in FY2014.

Total copper production is forecast to increase by five per cent (excluding divested assets) in FY2015 to 1.8 Mt. With further improvements in productivity anticipated, Escondida is on track to produce approximately 1.27 Mt of copper in the period. Copper volumes at Pampa Norte and Olympic Dam are expected to remain at a similar level to FY2014, while lower average copper grades are expected to lead to a reduction in copper production at Antamina in FY2015.

Lower average realised prices in FY2014 reduced Underlying EBIT by US$947 million, net of price-linked costs. A five per cent decline in the average realised price of copper to US$3.22 per pound was the major contributor. In contrast, a stronger US dollar against the Chilean peso and Australian dollar increased Underlying EBIT by US$359 million.

Underlying EBIT for FY2014 decreased by US$559 million to US$1.1 billion. Unit cash costs at our operated Copper Assets declined by six per cent during FY2014 despite the impact of a nine per cent reduction in ore grades at Escondida. In this context, productivity-led cost efficiencies increased Underlying EBIT by US$190 million and reflected insourcing initiatives and the broader optimisation of contractor activities across the Business.

A reduction in exploration and business development expenditure increased Underlying EBIT by a further US$217 million as the Group sharpened its focus on greenfield copper porphyry targets in Chile and Peru. In contrast, an increase in non-cash charges reduced Underlying EBIT by US$337 million during the period.

During the period, we completed the sale of the Pinto Valley mining operation and the associated San Manuel Arizona Railroad Company to Capstone Mining Corporation for US$653 million, after working capital adjustments.

In July 2013, we announced an investment of US$3.4 billion to construct a desalination facility, which will deliver sustainable water supply to Escondida over the long term. A US$212 million increase to the budget of the Escondida Oxide Leach Area Project to US$933 million was also approved during the period. The project is now scheduled for completion in the second half of CY2014. The commissioning of Organic Growth Project 1 remains on schedule to commence in the June 2015 quarter.

In July 2014, we lodged an application for assessment by the Australian and South Australian Governments to construct and operate a demonstration plant on the existing mining lease at Olympic Dam. This process would enable heap leaching trials to progress to the next phase as part of our efforts to identify an alternative, less capital intensive process for extracting metals from ore mined underground. Should government and Board approvals be granted, construction of the demonstration plant is expected to commence in the second half of CY2015. A trial period of 36 months is envisaged, commencing in late 2016.
Iron Ore

Iron ore production increased by 20 per cent, representing a fourteenth consecutive annual record; unit costs reduced 12 per cent in the June 2014 half year.

<table>
<thead>
<tr>
<th>US$ million</th>
<th>30 June 2014</th>

<tr>
<td>Capital expenditure</td>
<td>2,949</td>
</tr>
<tr>
<td>Net operating assets</td>
<td>23,390</td>
</tr>
</tbody>
</table>

Iron ore production increased by 20 per cent in FY2014 to a record 204 Mt (BHP Billiton share), exceeding initial full-year guidance by more than eight per cent. WAIO production of 225 Mt (100 per cent basis) represents a fourteenth consecutive annual record and was underpinned by the early commissioning of Jimblebar and our productivity agenda, which raised the capacity of our integrated supply chain.

In FY2015, WAIO production is expected to increase by a further 20 Mt to approximately 245 Mt (100 per cent basis). We expect additional productivity gains to support another year of record performance despite the planned tie-in of ship loaders 1 and 2 during the December 2014 half year. Total iron ore production is forecast to increase by 11 per cent in FY2015 to 225 Mt (BHP Billiton share).

A low-cost option to expand Jimblebar to 55 Mtpa (100 per cent basis) and broader debottlenecking of our mines and inner harbour infrastructure are expected to underpin further growth in WAIO supply chain capacity to 290 Mtpa (100 per cent basis). The additional 65 Mtpa of capacity is likely to have a capital intensity below US$50 per annual tonne, with the improvement in productivity and economies of scale also expected to significantly reduce unit costs.

A six per cent fall in the average realised price of iron ore to US$103 per wet metric tonne (FOB) reduced Underlying EBIT by US$864 million, net of price-linked costs, although this was partially offset by a weaker Australian dollar, which increased Underlying EBIT by US$383 million. Iron ore sales, on average, were linked to the index price for the month of shipment, with price differentials reflecting product quality.

Underlying EBIT for FY2014 increased by US$993 million to US$12.1 billion. An 18 per cent increase in WAIO sales volumes was the major contributor, adding US$1.8 billion to Underlying EBIT. Conversely, the progressive ramp-up of several major projects resulted in a US$425 million increase in depreciation and amortisation expense during the period. Having redirected the WAIO supply chain bottleneck away from the mines and back to the port, a 12 per cent reduction in unit costs to US$25.89 per tonne was achieved in the June 2014 half year.

A number of major project milestones were achieved during the period, further underscoring Iron Ore’s track record in project delivery. For example, the Jimblebar Mine Expansion project delivered first production six months ahead of schedule and the ramp-up to 35 Mtpa (100 per cent basis) is now expected before the end of CY2014. The WAIO Port Blending and Rail Yard Facilities project and fourth pellet plant at Samarco were also completed during the period. The fourth pellet plant is expected to ramp-up to 30.5 Mtpa (100 per cent basis) before the end of FY2015.
Metallurgical coal production increased by 20 per cent to a record 45 Mt.

<table>
<thead>
<tr>
<th>US$ million</th>
<th>30 June 2014</th>
</tr>
</thead>
<tbody>
<tr>

<tr>
<td>Net operating assets</td>
<td>14,300</td>
</tr>
</tbody>
</table>

Metallurgical coal production increased by 20 per cent in FY2014 to a record 45 Mt (BHP Billiton share). This was supported by first production from Caval Ridge, the successful ramp-up of Daunia and record production at Peak Downs, Saraji, South Walker Creek and Poitrel. Illawarra Coal production declined by five per cent as an extended outage at the Dendrobium mine impacted performance in the first half of the financial year.

Energy coal production of 73 Mt for FY2014 was broadly unchanged from the prior period, as planned. Another year of robust performance was underpinned by a fifth consecutive annual production record at New South Wales Energy Coal and record volumes at Cerrejón. Extended outages at both a local utility and the Richards Bay Coal Terminal led to lower production at Energy Coal South Africa, while Navajo Coal production declined following the permanent closure of three of the five power units at the Four Corners Power Plant.

Metallurgical coal production for FY2015 is expected to increase by four per cent to approximately 47 Mt as the ramp-up of Caval Ridge is completed. Energy coal production for FY2015 is expected to remain broadly unchanged at 73 Mt.

A stronger US dollar against both the Australian dollar and South African rand increased Underlying EBIT by US$543 million. This was more than offset by a 20 per cent and 14 per cent reduction in the average price received for hard coking coal and weak coking coal, respectively. The average price received for thermal coal also declined by 14 per cent during the period. In total, lower average realised prices reduced Underlying EBIT by US$1.4 billion, net of price-linked costs.

Underlying EBIT for FY2014 declined by US$209 million to US$386 million despite productivity-led volume and cost efficiencies of US$1.3 billion being embedded during the period. A sustainable increase in truck and wash-plant utilisation rates underpinned this improvement in productivity, while a reduction in labour, contractor and maintenance costs was also achieved. In this context, redundancies totalling US$40 million were recognised in FY2014, while an increase in non-cash charges reduced Underlying EBIT by a further US$497 million. The latter included a US$292 million impairment charge at Energy Coal South Africa. An US$84 million gain on the sale of the Energy Coal South Africa Optimum Coal purchase agreement was also recognised during the period.

We completed the sale of the Navajo mine to the Navajo Transitional Energy Company (NTEC), effective 30 December 2013. As we will retain control of the mine until full consideration is received from NTEC, production and financial results for the Navajo mine will continue to be reported by the Group.

The Caval Ridge mine project was completed ahead of schedule and under budget during the period with the ramp-up to 5.5 Mtpa of premium hard coking coal expected by the end of FY2015. The Appin Area 9 and Hay Point Stage Three Expansion projects remain on schedule and budget.
## Aluminium, Manganese and Nickel

### RESULTS

Productivity-led cost efficiencies of US$335 million contributed to an increase in Underlying EBIT of US$149 million to US$307 million.

<table>

Alumina production increased by six per cent in FY2014 to a record 5.2 Mt. The Efficiency and Growth project at Worsley reached nameplate capacity during the year and annual production records were achieved at both the Worsley and Alumar refineries. Aluminium production of 1.2 Mt was unchanged from FY2013, with production records at both Hillside and Mozal offset by lower volumes at Alumar following the phased suspension of 103 kt (BHP Billiton share) of annualised capacity.

Manganese ore production declined by three per cent in FY2014 to 8.3 Mt as GEMCO was affected by higher than usual rainfall during the wet season. Manganese alloy production increased by six per cent from FY2013, which was affected by the temporary suspension of operations at TEMCO.

Nickel production declined by seven per cent in FY2014 to 143 kt. Production at Cerro Matoso was affected by kiln and furnace outages and lower nickel grades. Nickel West production declined by four per cent following the closure of the Perseverance underground mine in November 2013. Saleable nickel production at Nickel West is expected to decline by four per cent in FY2015 to 95 kt, with approximately 55 per cent to be sourced from third party supply feed. Ferronickel production at Cerro Matoso is expected to decline by three per cent to 43 kt as a result of lower grades.

Notwithstanding a rebound in nickel and aluminium prices in the second half, lower average realised prices reduced Underlying EBIT by US$409 million during FY2014, net of price-linked costs. More specifically, lower average realised prices for aluminium (down six per cent to US$2,022 per tonne), manganese ore (down four per cent to US$4.64 per dry metric tonne unit), manganese alloy (down six per cent to US$980 per tonne) and nickel (down seven per cent to US$14,925 per tonne) were only partially offset by an increase in the average realised price of alumina (up two per cent to USS307 per tonne).

Underlying EBIT for FY2014 increased by US$149 million to USS307 million. A reduction in headcount and consumable costs, as well as equipment debottlenecking at most assets, contributed to the US$335 million of productivity-led cost efficiencies embedded during the period. A stronger US dollar against the Australian dollar and South African rand increased Underlying EBIT by a further US$469 million. In contrast, the cessation of aluminium smelting activities at Bayside and the closure of the Perseverance underground mine at Nickel West reduced Underlying EBIT by US$341 million. Redundancies totalling US$40 million were incurred during the period.

In May 2014, the Group announced a review of the Nickel West business, comprising the Mt Keith, Cliffs and Leinster mines, its concentrators, the Kalgoorlie smelter and the Kwinana refinery. The review is considering all options for the long-term future of Nickel West, including the potential sale of all or part of the business.
Sustainability

Putting health and safety first, being environmentally responsible and supporting our host communities.

Sustainability is core to our strategy, ensuring we integrate health, safety, environmental, social and economic factors into our decision-making. Our priority is to identify, understand and manage the material risks within our business, ensuring our people, suppliers, contractors and the communities in which we operate remain safe and healthy. We are committed to being responsible stewards of the natural resources we develop and use in our operations and seek to minimise the environmental impact of our operations. We strive to be part of the communities in which we operate, and seek to foster meaningful, long-term relationships that respect local cultures and create lasting benefits.

**OPERATING SUSTAINABLY**

9 per cent reduction
total recordable injury frequency.
No fatalities at our operated assets

1.7 million
to within gas emissions (CO2-e)

US$241.7 million
voluntary community investment
Sustainability

We are focused on keeping our people safe and healthy, minimising our environmental impact and contributing to the economic and social development of our host communities.

Maintaining our social licence to operate as a global company is dependent upon gaining access to natural resources and ensuring we earn the trust of our shareholders, employees, contractors, communities, customers and suppliers. Our BHP Billiton Charter value of Sustainability is core to our strategy and we integrate health, safety, environmental, social and economic factors into our decision-making.

Keeping our people safe and healthy

Regardless of where we work or what we do, we strive to create a working environment that is free from injury and illness. Our priority is to identify and manage the material risks within our business, ensuring our people, suppliers and contractors and the communities in which we operate remain safe and healthy.

In FY2014, no fatalities were reported at our operated assets. This is the goal we aspire to achieve on an ongoing basis. In prior years, we have been successful in significantly reducing but not in eliminating fatalities, and this year we continued to see potentially significant safety events. During FY2014, our overall total recordable injury frequency performance of 4.2 injuries per million hours worked improved by nine per cent compared with 4.6 per million hours worked in FY2013.

To prevent occupational illness and injury, we are focused on ensuring the work our people are required to do does not impact their health and that they are fit for work. This means identifying and assessing risk factors and managing and minimising their impact. In FY2014, the incidence of employee occupational illness was 2.84 per million hours worked, an increase of 19 per cent on FY2013. The incidence of employee occupational illness has been increasing across the Group since FY2010, largely due to increased reporting of musculoskeletal illnesses. Where an individual has been identified as having a work-related illness or injury, we facilitate medical treatment and, where necessary, a rehabilitation program based on medical advice. We also seek to optimise return-to-work outcomes through early reintegration into the workplace, to the extent practicable. In FY2012, we established a health target baseline and committed to reduce potential occupational exposure to carcinogens and airborne contaminants by 10 per cent by FY2017. In FY2014, we recorded a 22 per cent decrease in the number of potential exposures to carcinogens and airborne contaminants, if not for the use of personal protective equipment, compared with our FY2012 baseline. We have therefore currently exceeded our target; however, exposure control remains an area of focus to ensure our reductions are maintained.

Our perspective on climate change

The Board is responsible for overseeing the Group’s approach to climate change and making strategic decisions in the best interests of the Company. This includes taking into account the potential impact of climate change on the strategy of the Company, including the portfolio of assets and investments.

Our strategy is tied to economic growth in both emerging and developed economies. Sustainable growth requires an effective response to climate change. BHP Billiton accepts the Intergovernmental Panel on Climate Change (IPCC) assessment of climate change science which has found that warming of the climate is unequivocal, the human influence is clear and physical impacts are unavoidable. We believe the world must pursue the twin objectives of limiting climate change to the lower end of the IPCC emission scenarios in line with current international agreements, while providing access to the affordable energy required to continue the economic growth essential for maintaining living standards and alleviating poverty.

We have a diverse portfolio that is important in meeting global demand for energy. We can, and will, continue to adjust the shape of our portfolio to match energy and commodity demand and meet society’s expectations, while maximising shareholder returns. Our approach to investment decision-making and portfolio management ensures that climate change risks are identified, assessed and appropriately addressed. We have been applying an internal price on carbon in our investment decisions and portfolio evaluation for more than a decade and were early adopters of this approach. We maintain a view on carbon pricing using a carbon price protocol which we update regularly. Our carbon price protocol tracks the progress of national commitments to tackle climate change throughout the world, including our major operating regions and customer demand centres, and considers various potential scenarios for how global emissions and policy will evolve over time.

We look at the potential for reductions in emissions and the cost associated with those reductions to determine an appropriate price level for each relevant country or region. In doing so, we consider the effectiveness of different policies, political situations required to pass legislation, timing to implement reductions and the interaction between policy mechanisms.

We will continue to take action to reduce our emissions and build the resilience of our operations, investments, communities and ecosystems to the impacts of climate change. Recognising their role as policy makers, we engage with governments to enhance the global response. We work in partnership with resource sector peers...
to improve sectoral performance and increase industry’s influence in policy development to deliver effective long-term regulatory responses. To effectively address the challenge of climate change, there must be a significant focus on developing and deploying low-emissions technologies over the next few decades. Through material investments in low-emissions technology, we will contribute to reducing emissions from the use of fossil fuels.

Minimising our environmental impact
As a global organisation operating in different countries and ecosystems around the world, we seek to understand the sources, scope, extent and impacts of our natural resources use and transparently report our performance. We demonstrate environmental responsibility by minimising our environmental impacts and contributing to enduring benefits to biodiversity, ecosystems and other environmental resources.

We strive to continually improve energy and greenhouse gas (GHG) management. Our Businesses are required to identify, evaluate and implement suitable projects that prevent or minimise GHG emissions, including in project design and equipment selection. In FY2013, we set an ambitious target to maintain our total FY2017 GHG emissions below our FY2006 baseline levels, while continuing to grow our business. In FY2014, our GHG emissions of 45.0 million tonnes (Mt) of carbon dioxide equivalent (CO₂-e), is a reduction of 1.7 Mt of CO₂-e compared to FY2013 (46.7 Mt CO₂-e). This keeps us in line to achieve our target.

Improving our management of land and enhancing biodiversity are essential to operating in a responsible and sustainable manner. Our operations are required to develop and maintain land and biodiversity management plans that include controls to avoid, minimise, rehabilitate and apply compensatory actions as appropriate, to offset the biodiversity and ecosystem impacts of our operations.

In addition to the environmental management actions of our Businesses, the Group has a target to voluntarily commit to financing the conservation and ongoing management of areas of high biodiversity and ecosystem value that are of national or international conservation significance. We established an alliance with Conservation International to support the delivery of this target and improve our approach to biodiversity management more broadly. As a result, we will improve our environmental performance and broaden our contributions to lasting environmental benefits beyond what could be achieved by our operations alone. Since setting the target in FY2013, we have committed more than US$30 million to conservation, in addition to the environmental management activities at our operations.

We recognise the role we have as responsible stewards of the water resources we share with our host communities and the environment. Recognising the regional nature of our water-related risks, we introduced a target in FY2013 requiring our Businesses with water-related material risks to implement projects to improve the management of water resources. In FY2014, all our operations that identified water-related material risks, implemented at least one project to improve the management of associated water resources.

Making a positive contribution to society
Creating lasting economic and social benefit for our host communities is fundamental to our organisation. This helps create a diversified local economy and ensures our investment continues to benefit the community beyond the life of our operations.

Our contribution to our host communities is broad ranging. Through direct and indirect employment, taxes and royalties we support local, regional and national economies. We purchase local goods and services and develop infrastructure that benefits entire communities, including roads, airfields, emergency response facilities, housing, public amenities and community facilities that can be accessed and utilised by local communities and businesses. In developing nations, we continue to supply commodities that support economic development and improve standards of living.

As part of our community commitment, we voluntarily invest one per cent of our pre-tax profit, calculated on the average of the previous three years’ pre-tax profit, in community programs that aim to have a long-lasting, positive impact on the quality of life for people in our host communities. During FY2014, our voluntary community investment totalled US$241.7 million, comprising US$141.7 million of cash, in-kind support and administrative costs and a US$100 million contribution to the BHP Billiton Foundation.

Many of our employees make valuable contributions to their local communities through donations of money, time and expertise. As part of our community investment, our Matched Giving Program doubles personal donations made by our employees as well as the amount we provide for volunteerism, making the program one of the most generous workplace giving programs. In FY2014, more than 8,700 of our employees participated in the Matched Giving Program, volunteering approximately 66,500 hours of their personal time to community activities. Employee contributions benefited more than 1,894 not-for-profit organisations, which received US$12.1 million as part of the program.

Additional information relating to our sustainability performance and our community investment is available in our Sustainability Report 2014 and online at www.bhpbilliton.com.
Respect

Embracing openness, trust, teamwork, diversity and relationships that are mutually beneficial.

People are the foundation of our organisation and underpin our success. We value our people and encourage the development of talented and motivated employees to support the continued performance and growth of our diverse operations. We strive to build a sense of purpose and achievement among all our people in the work we do. By working to Our BHP Billiton Charter, we align our people around our common purpose and values.

**EMPOWERING OUR PEOPLE**

123,803 employees and contractors

116 different nationalities represented in our workforce

34 per cent global female graduate intake
Respect

To achieve success in a business that is diversified by commodity, geography and market we require talented, diverse and inclusive teams that reflect our communities.

Building a high-performance organisation
Empowering our people to identify and implement improvements that maximise our performance has the potential to improve our productivity and create value. We have a skilled, motivated and engaged workforce that values our work and the contribution we make. Through our people strategy, we are strengthening the capability of our leaders to navigate change and enabling our people to step up, develop and realise their potential.

In FY2014, our leaders participated in a series of Executive Leadership Programs (ELP) to provide them with the support they need to evolve our culture and enable our people to step up. Participants from across the Group engaged in discussions about further strengthening our step-up culture and leading change. Ideas and feedback from the sessions were integrated back into the Businesses, with senior leadership teams connecting after each event to share learnings. The ELP was 100 per cent leader-led, highly experiential and dialogue-based.

In FY2013, an employee survey allowed us to establish a baseline measure of culture to benchmark our performance against other global high-performing companies. This survey of more than 16,000 employees confirmed the key drivers of step-up culture and productivity. The survey revealed our strengths were in safety and sustainability, alignment to our strategy, goals and values, and the positive relationships within our work groups. Opportunities included how leaders at all levels communicate and engage employee opinion and provide feedback and coaching for employee development, and ensuring we continue to enable high performance through efficient processes, effective tools and resources. In FY2014, we invited all employees to participate in a brief survey. We will continue to use an annual survey to measure progress and ensure we are strengthening our step-up culture to enable productivity.

To help our people focus on clear, aligned and measurable goals, 74 per cent of our employees participated in a formal performance review process. This process also provided the opportunity to receive feedback and coaching, and to develop skills and capabilities through the execution of each individual’s development plan. Our transparent reward practices and processes are designed to ensure performance is measured on fact-based outcomes and to reward people for both what they achieve and how they achieve it. Our people participate in training and development programs designed specifically to meet local requirements. On average, each employee received 44 hours of training and development throughout the year, including health and safety training. As part of our mandatory induction process, our people undertake training on the BHP Billiton Code of Business Conduct, which includes our position on anti-corruption.

Focusing on diversity and inclusion
In FY2014, our global workforce comprised 47,044 employees and 76,759 contractors working at 130 locations in 21 countries. We are committed to diversity in the broadest sense, including thought and perspective, age, disability, nationality, ethnicity, orientation and gender. We strive to achieve diversity across our Company and at all levels of our organisation.

Our Board of Directors is comprised of 14 members, including two women, and representing eight nationalities. The Board believes critical mass is an important driver of a more diverse workplace, and in relation to gender diversity has set a goal of increasing the number of women on the Board to at least three.

Pay equity for our 372 senior leaders is based on skills, experience and size of role. The male-to-female overall salary ratio is 1.03:1.00. Across the Group, our workforce comprises 116 different nationalities and 23 different ethnicities. Our workforce gender composition is 16 per cent female and 84 per cent male. Almost half of our workforce is employed in Australia. The majority of our contractors work in Australia and South America.
Our Charter continues to give us guidance on how our work is executed and decisions are made. We expect all employees to demonstrate behaviours that support diversity and create a collaborative and inclusive work environment as part of Our Charter Values in Action. This is an integral element of our performance management process against which our people are assessed, coached and provided feedback.

In our graduate recruitment program, we continued to implement targeted initiatives to increase our intake of female graduates in specific disciplines and attract the best graduate candidates from a diverse graduate talent pool. In our Copper Business, we achieved 43 per cent female representation in the Chilean graduate program. In Australia, graduate recruitment campaign initiatives targeting women included tailored marketing materials and events. Globally, our proportional intake of women into the graduate program has increased by three percentage points to bring the number of female graduates to 34 per cent.

As part of our stated commitment to diversity and inclusion, all our Businesses, Group Functions and Marketing develop and implement multi-year diversity plans. We continue to make progress through targeted recruitment initiatives designed to increase the representation of females and ethnically diverse employees; learning sessions on diversity and inclusion; and development strategies for high-potential females. Female representation in our Accelerated Leadership Development Program, which commenced in FY2013, remains at 41 per cent.

During FY2015, we will continue to execute our Group-wide diversity and inclusion strategy and promote an inclusive work environment that embraces and more effectively leverages the diversity of our people. In FY2014, success against our diversity and inclusion objectives was considered when assessing variable remuneration.

Attracting the right people
We attract and employ people with exceptional skills who share our values. As a global employer, we actively look to promote from within. Throughout our Company, recruitment is managed locally with employment opportunities offered on the basis of merit. Every individual who applies for a job with us is evaluated according to their job-related skills, qualifications, abilities, aptitudes and alignment with Our Charter values.

In some jurisdictions, targeted affirmative action may be required to address any imbalances. This is achieved through Indigenous employment and training programs, Broad-Based Black Economic Empowerment and by giving priority to increasing the representation of females in our workforce.

To meet our current and future human resourcing requirements, we undertake resourcing activities at the local, national and global level that are aligned to our broader business strategy. Internal candidates are prioritised for roles, supplemented by external recruitment in the local labour market.

As many of our operations are located remotely, we seek to attract and retain a diverse workforce with a range of employment models offering choice and quality options for facilities, rosters and living arrangements, including residential and fly in, fly out or drive in, drive out workforce practices where people work on-site and reside outside the community.

Supporting employees
As a global organisation, our business experiences continual change at the Group and local level. To assist our people and their immediate families to deal with any issues that may be affecting their life or work, a free 24-hour Employee Assistance Program offers confidential support and counselling.
Simplicity
Focusing our efforts on the things that matter most.

Creating a more productive organisation and simplifying our portfolio are ongoing priorities for our Company. Maintaining our focus on these outcomes has delivered results, with sustainable productivity-led gains of US$2.9 billion delivered during FY2014. Improving productivity remains our focus as we strive to operate more efficiently, deliver our strategy and create value in the long term.

On 19 August 2014, we announced a plan to create an independent global metals and mining company via a demerger. Simplifying the Group and creating two portfolios of complementary assets has the potential to unlock shareholder value.

FOCUS ON PRODUCTIVITY

US$2.9 billion
productivity-led gains in FY2014

US$6.6 billion
sustainable productivity-led gains over the last two years

One
common planning and reporting system
Simplicity

Our disciplined focus on productivity and simplifying the way we work continues to deliver shareholder value.

Our long-term commitment to improve productivity across the organisation has the potential to create significant value for shareholders and other stakeholders.

Our focus on productivity has already resulted in significant improvement in operating performance at each of our major businesses this year, with a nine per cent increase in Group production and record output at 12 operations and across four commodities. For FY2014, productivity-led volume improvements and cash cost efficiencies, totalling US$2.9 billion, have been delivered. This means we have now delivered more than US$6.6 billion of sustainable productivity-led gains over the last two years.

Productivity agenda
We are focused on achieving sustainable improvement in productivity across all aspects of our business. We believe our systems, structures, culture, people and portfolio enable the creation of a competitive advantage by working smarter to safely deliver greater volume growth from existing plant and equipment at lower unit cost.

Recognising that culture also drives performance, BHP Billiton is continuing to create an inclusive environment where every employee feels engaged. We want our people to feel listened to, be motivated to contribute to their potential and work together to unlock world-class productivity from the ground up.

We support the development of our people and encourage our teams to learn from each other, identify more productive ways of working and achieve functional excellence across the Group.

Since the October 2013 completion of our deployment of 1SAp, our single Group-wide common enterprise resource planning system, we are now using common world-class business processes, standard metrics and reports that are supported by robust data. The implementation of 1SAp across the organisation supports our ability to pursue sustained improvement through the application of standard processes and performance transparency.

Operating Model
The BHP Billiton Operating Model is pivotal to our productivity agenda. The Operating Model defines how we work, how we are organised and how we measure performance.

The core principles of the Operating Model include mandatory performance requirements, common organisational design, common systems and processes, and common planning and reporting. The Operating Model is designed to deliver a simple and scalable organisation, to achieve a sustainable improvement in productivity by providing performance transparency, eliminating duplication of effort and enabling the more rapid identification and deployment of best practice.

Our unique operating environment means tangible productivity gains materialise in different ways. Below is an example that illustrates the success to date of our focus.

Case study: Cost and time reductions in Petroleum’s Onshore US shale drilling and completions

Objective: To reduce the time and cost required to put each well online.
Approach: Opportunities were identified through statistical analysis and comparison against internal best practice and external benchmarks. Improvements in performance were sought in three areas: engineering (changes in the design of each well); operations (changes in how operations are conducted in the field); and supply (shifts in what and how goods and services are procured and delivered).
Outcomes: Rig mobilisation times have been cut by 12 per cent in FY2014 through the development and implementation of an optimised rig move procedure. The average drilling time for a shale gas well has declined in FY2014, while the productivity of hydraulic fracturing crews (stages completed per crew per month) has grown in FY2014.
Productivity results: Overall, total Onshore US shale drilling costs per well have decreased by 15 per cent in FY2014.
Simplification of the portfolio
In the last two years, the Group has announced or completed divestments in Australia, the United States, Canada, South Africa and the United Kingdom, including petroleum, copper, coal, mineral sands, uranium and diamonds assets and projects.

Proposed demerger of assets
On 19 August 2014, we announced a plan to create an independent global metals and mining company based on a selection of our high-quality aluminium, coal, manganese, nickel and silver assets.

As a result of the growth of our major Businesses and the Group’s substantial investment in recent years, BHP Billiton now has two great companies embedded within its portfolio. Separating these assets via a demerger has the potential to unlock shareholder value by significantly simplifying the Group.

BHP Billiton’s continued diversification
If the demerger is approved, we would focus almost exclusively on our large, long-life iron ore, copper, coal, petroleum and potash basins. By concentrating on the development and operation of these basins, BHP Billiton expects to reduce costs and improve productivity more quickly.

Following the demerger, BHP Billiton would have a simpler portfolio with fewer assets and a greater focus on upstream operations.

BHP Billiton would remain the largest exporter of metallurgical coal, a global top three producer of iron ore, a global top four exporter of copper concentrate, the largest overseas investor in onshore US shale and developer of the world’s best undeveloped potash resource in Saskatchewan, Canada.

Consistent with our established strategy, our Core Portfolio* provides broad exposure to steelmaking raw materials, copper, energy and potentially agricultural markets and will remain diversified by commodity, geography and market.

BHP Billiton’s Charter values and commitment to putting health and safety first, being environmentally responsible and supporting the communities in which we operate will remain unchanged.

We will continue to simplify our portfolio and as part of this process are reviewing our Nickel West, New Mexico Coal and smaller petroleum assets.

A new global metals and mining company
The new company would have assets in five countries. Many of its operations are among the most competitive in their industries and in FY2014 its portfolio would have generated revenues of nearly US$10 billion. Its assets would include BHP Billiton’s integrated Aluminium business, Cannington silver. Energy Coal South Africa, Illawarra metallurgical coal, Cerro Matoso nickel and BHP Billiton’s Manganese business.

By tailoring its approach, and retaining elements of BHP Billiton’s common systems and processes, the new company would be designed to operate safely, reduce overheads and deliver improved performance.

Management, board and listings
If approved by shareholders, it is proposed that the Chairman of the new company would be David Crawford, who will retire from the BHP Billiton Board in November 2014. Graham Kerr, Chief Financial Officer, would assume the role of Chief Executive Officer of the new company, based in Perth. It is intended that Keith Rumble will become a Non-executive Director of the new company that BHP Billiton plans to form in the proposed demerger. Mr Rumble would retire from the BHP Billiton Board at the time the shareholders vote on this demerger proposal. The BHP Billiton Board also intends to nominate Xolani Mkhwanazi, currently BHP Billiton’s Chairman South Africa, as a Non-executive Director of the new company.

The importance of South Africa to the new company would be reflected in the formation of its board and management team, as well as its commitment to the country’s economic development and transformation objectives.

The new company is intended to be listed on the Australian Securities Exchange (ASX) with an inward secondary listing on the Johannesburg Stock Exchange (JSE).

A responsible operator
The new company would be committed to responsible environmental management, the safe operation of its assets and to making a positive contribution to its host communities and nations. BHP Billiton’s existing community commitments will be fulfilled, while the new company would foster its own partnerships and establish its own community programs.

BHP Billiton shareholders
BHP Billiton Limited and Plc shareholders would be entitled to 100 per cent of the shares in the new listed company through a pro-rata, in-specie distribution, as well as retaining their existing shares in the Group.

Subject to final Board approval to proceed, shareholder approval and the receipt of satisfactory third party approvals, the demerger is expected to be completed in the first half of CY2015.

* Core assets include: Western Australia Iron Ore, Samarco, Queensland Coal, NSW Energy Coal, Cerrejón, Escondida, Olympic Dam, Pampa Norte, Antamina, Onshore US, Shenzi, Mad Dog, Atlantis, Angostura, North West Shelf, Bass Strait, Pyrenees, Macedon and Jansen Project.
Integrity

Doing what is right and doing what we say we will do.

To maintain our position as one of the world’s leading companies, we are committed to ethical business practices and high levels of governance in all our dealings. We believe consistent and appropriate business conduct creates loyalty and trust with our stakeholders. Our long-term success is dependent upon our ability to transparently report on and conduct our business.
Integrity

We are committed to creating a culture with exceptional performance, high ethical business practices and robust governance standards.

As a global business, we are committed to upholding international standards and ethical business practices. We operate in an industry where many of our activities are highly regulated by health, safety and environmental laws. We are committed to compliance with the laws and regulations of the countries in which we operate and, where applicable, to exceeding legal and other requirements that are less stringent than our own.

Ensuring proper business conduct

The Code of Business Conduct represents our commitment to upholding ethical business practices and applies to every employee, our suppliers and contractors, and our business partners working with or for us.

Underpinned by Our BHP Billiton Charter values, the Code of Business Conduct makes it clear that commercial objectives can never compromise our commitment to working with integrity. We recognise at times our people may find themselves in situations where complying with the Code of Business Conduct may appear to conflict with the ability to win or retain business. We have confidence that in upholding the Code of Business Conduct, we are working in the right way.

Embedding the requirements of the Code of Business Conduct across BHP Billiton is the responsibility of every leader. Each area of the Group has the responsibility of completing and executing annual training and communication plans, including face-to-face meetings with all employees and certain contractors.

To address any grievances or concerns that may be raised by our internal or external stakeholders, we have a number of reporting mechanisms available across the Group, including reporting to line managers or human resources representatives. EthicsPoint, our business conduct advisory service, is a worldwide service available to internal and external stakeholders that facilitates the raising, management and resolution of business conduct queries and concerns via a confidential 24-hour, multilingual hotline and online case management system.

| Contact details for the EthicsPoint service are available on our website at www.bhpbilliton.com. |

In addition, community complaint and grievance processes are available at a local level to acknowledge, investigate and document community concerns. Depending on the nature and severity of a concern that has been raised, it may require referral or further investigation. The management of queries, concerns and business conduct investigations is undertaken and recorded in accordance with defined processes.

Anti-corruption

Our Anti-corruption Group Level Document and Code of Business Conduct prohibit bribery and corruption in all our business dealings regardless of the country or culture within which our people work. Our procedures require appropriate due diligence in selecting and engaging third parties, the maintenance of accurate and reasonably detailed records of expenditures and the implementation and maintenance of specific approval requirements for corruption-sensitive transactions. We also prohibit any and all facilitation payments to government officials.

As previously disclosed, BHP Billiton received requests for information in August 2009 from the US Securities and Exchange Commission (SEC). Following that request, the Group commenced an internal investigation and disclosed to relevant authorities evidence that it has uncovered regarding possible violations of applicable anti-corruption laws involving interactions with government officials.

The issues relate primarily to matters in connection with previously terminated exploration and development efforts, as well as hospitality provided as part of the Company’s sponsorship of the 2008 Beijing Olympics. The Group is currently discussing a potential resolution of the matter.

As has been publicly reported, the Australian Federal Police has indicated that it has commenced an investigation and disclosed to relevant authorities evidence that it has uncovered regarding possible violations of applicable anti-corruption laws involving interactions with government officials.

In light of the continuing nature of the investigations it is not appropriate at this stage for BHP Billiton to predict outcomes.
Our transparency principles

Responsibility
Governments, civil society and the corporate sector must work in partnership to support transparency and help fight corruption. We are committed to acting transparently and publicly reporting the payments we make to governments.

Openness
Transparency is in the best interests of our shareholders, employees, contractors, partners, the customers, communities and societies in which we operate, and is essential to good governance and responsible investment.

Fairness
Nations that share resource wealth and are accountable to their communities have the potential to attract greater, more responsible and long-term investment. Ensuring our host communities share in our success is critical to the long-term future of our Company.

Accessibility
Revenue transparency information must be meaningful, practical and presented in a form that is easily captured, reported and understood. Governments, corporations and civil society organisations have important roles to play in ensuring communities have the capacity to analyse and effectively interpret the information provided.

(1) The Group claims refunds of transaction taxes (for example, GST/VAT and Fuel Tax) paid to suppliers for in-country purchases of goods, services and eligible fuel, and also collects GST/VAT in respect of certain sales to customers as set out in the table. These amounts are not included in taxes borne.

(2) Taxes borne by BHP Billiton are reported on a 100 per cent basis for subsidiaries and equity share basis for joint operations. Taxes borne primarily comprises income tax and royalty-related taxes paid, royalties paid in-kind, customs and excise payments, payroll taxes paid, payments of Fringe Benefits Tax and production-based royalties accrued, which approximate cash payments. Ancillary payments, such as licences, visas, sales taxes, stamp duty payment and land tax, are excluded. Taxes borne by BHP Billiton’s joint ventures and associates are not included in the amounts above.

We have developed four principles to outline what we believe any transparency framework should encompass to best tackle the fight against corruption.

In line with our support for the EITI, we report taxes and royalties derived from resource developments on a country-by-country basis. The data is presented as the taxes and royalties that we pay as BHP Billiton (such as corporate income taxes and royalties) and also those that we collect on behalf of our employees.

Our payments to governments in FY2014 included US$9.9 billion in company taxes, royalties and approximately US$1.5 billion in taxes collected on behalf of our employees. More than 99 per cent of our payments were made to 14 countries. Of these, our largest payments are made in Australia, where we have the majority of our assets.

This data is available in our Sustainability Report 2014, which can be downloaded from the BHP Billiton website at [www.bhpbilliton.com](http://www.bhpbilliton.com).
Accountability

Defining and accepting responsibility and delivering on our commitments.

Our governance structure supports long-term value creation. Governance is not just a matter for the Board, it is also the responsibility of executive management and is embedded throughout the organisation. We foster a culture that values and rewards high ethical standards, personal and corporate integrity and respect for others.

ROBUST GOVERNANCE FRAMEWORK

High-quality governance supports long-term value creation

Our BHP Billiton Charter is the core of our governance framework

We are focused on enhancing the diversity of perspective on the Board
Jac Nasser  
AO, BBus, Hon D, 66  
Chairman and Independent Non-executive Director  
Chairman of the Nomination and Governance Committee  
Director of BHP Billiton Limited and BHP Billiton Plc since June 2006.  
Appointed Chairman of BHP Billiton Limited and BHP Billiton Plc on 31 March 2010.  
Following a 33-year career with Ford Motor Company in leadership positions in Europe, Australia, Asia, South America and the United States, Jac Nasser served as a member of the Board of Directors and as President and Chief Executive Officer of Ford Motor Company from 1998 to 2001.  
Mr Nasser has more than three decades of experience in large-scale global businesses and a decade of private equity investment and operating expertise.  
Other directorships and offices (current):  
  • Director of 21st Century Fox (since June 2013).  
  • Consultant to One Equity Partners (since March 2013). Partner from November 2002 until March 2010, Non-executive Advisory Partner from March 2010 to March 2013.  
  • Member of Australian Prime Minister’s Business Advisory Council (since December 2013).  
  • Member of the International Advisory Council of Allianz Aktiengesellschaft (since February 2001).  

Andrew Mackenzie  
BSc (Geology), PhD (Chemistry), 57  
Chief Executive Officer and Executive Director  
Non-independent  
Director of BHP Billiton Limited and BHP Billiton Plc since May 2013.  
Mr Mackenzie was appointed Chief Executive Officer on 10 May 2013.  
Andrew Mackenzie has more than 30 years’ experience in oil and gas, petrochemicals and minerals. He joined BHP Billiton in November 2008 as Chief Executive Non-Ferrous. Prior to BHP Billiton, Mr Mackenzie worked at Rio Tinto, where he was Chief Executive of Diamonds and Minerals, and BP where he held a number of senior roles, including Group Vice President for Technology and Engineering, and Group Vice President for Chemicals.  
Other directorships and offices (current):  
  • Director of the Grattan Institute (since May 2013).  
  • Director of the International Council on Mining and Metals (since May 2013).  

Malcolm Brinded  
CBE, MA, 61  
Independent Non-executive Director  
Member of the Sustainability Committee  
Director of BHP Billiton Limited and BHP Billiton Plc since April 2014.  
Malcolm Brinded has extensive experience in energy, governance and sustainability. Mr Brinded served as a member of the Board of Directors of Royal Dutch Shell plc from 2002 to 2012. During his 37-year career with Shell he held various leadership positions in the United Kingdom, Europe, the Middle East and Asia, including Executive Director of Exploration and Production, Executive Director of Upstream International and Chairman and Upstream Managing Director of Shell UK.  
Other directorships and offices (current):  
  • Director of CH2M Hill Companies, Ltd (since July 2012).  
  • Director of Network Rail Ltd; Network Rail Infrastructure Ltd (since October 2010).  
  • Chairman of the Shell Foundation (since July 2009 and Trustee since June 2004).  
  • Vice President of the Energy Institute, UK (since October 2013).  

Malcolm Broomhead  
MBA, BE, 62  
Independent Non-executive Director  
Member of the Sustainability Committee  
Member of the Finance Committee  
Director of BHP Billiton Limited and BHP Billiton Plc since March 2010.  
Malcolm Broomhead has extensive experience in running industrial and mining companies with a global footprint and broad global experience in project development in many of the countries in which BHP Billiton operates. Mr Broomhead was Managing Director and Chief Executive Officer of Orica Limited from 2001 until September 2005. Prior to joining Orica, Mr Broomhead held a number of senior positions at North Limited, including Managing Director and Chief Executive Officer and, prior to that, held senior management positions with Halcrow (United Kingdom), MIM Holdings, Peko Wallsend and Industrial Equity.  
Other directorships and offices (current):  
  • Chairman of Asciano Limited (since October 2009).  

Sir John Buchanan  
BSc, MSc (Hons 1), PhD, 71  
Senior Independent Director, BHP Billiton Plc  
Chairman of the Remuneration Committee  
Member of the Nomination and Governance Committee  
Director of BHP Billiton Limited and BHP Billiton Plc since February 2003.  
Educated at Auckland, Oxford and Harvard, Sir John Buchanan has broad international business experience gained in large and complex international businesses. Sir John has substantial experience in the petroleum industry and knowledge of the international investor community. Sir John has held various leadership roles in strategic, financial, operational and marketing positions, including executive experience in different countries. Sir John is a former Chairman of ARM Holdings Plc (United Kingdom), former Chairman of Smith & Nephew Plc and former member of Advisory Board of Ondra Bank. Sir John is also a former Executive Director and Group Chief Financial Officer of BP, Treasurer and Chief Executive of BP Finance and Chief Operating Officer of BP Chemicals.  
Other directorships and offices (current):  
  • Chairman of the International Chamber of Commerce (United Kingdom) (since May 2008).
Carlos Cordeiro
AB, MBA, 58
Independent Non-executive Director
Member of the Remuneration Committee
Director of BHP Billiton Limited and BHP Billiton Plc since February 2005.
Carlos Cordeiro brings to the Board more than 30 years’ experience in providing strategic and financial advice to corporations, financial institutions and governments around the world. Mr Cordeiro was previously Partner and Managing Director of Goldman Sachs Group Inc and Vice Chairman of Goldman Sachs (Asia) LLC.

Other directorships and offices (current):
• Non-executive Advisory Director of The Goldman Sachs Group, Inc. (since December 2001).
• Non-executive Vice Chairman of Goldman Sachs (Asia) LLC (since December 2001).

David Crawford
AO, BComm, LLB, FCA, FCPA, 70
Independent Non-executive Director
Chairman of the Finance Committee
David Crawford has extensive experience in risk management and business reorganisation. He has acted as a consultant, scheme manager, receiver and manager and liquidator to very large and complex groups of companies. Mr Crawford was previously Australian National Chairman of KPMG, Chartered Accountants. In August 2014, Mr Crawford was appointed as Chairman-designate of the new company that BHP Billiton plans to form in the proposed demerger. Mr Crawford will retire from the BHP Billiton Board in November 2014.

Other directorships and offices (current):
• Chairman of Australia Pacific Airports Corporation Limited (since May 2012).
• Chairman of Lend Lease Corporation Limited (since May 2003) and Director (since July 2001).

Pat Davies
BSc (Mechanical Engineering), 63
Independent Non-executive Director
Member of the Remuneration Committee
Director of BHP Billiton Limited and BHP Billiton Plc since June 2012.
Pat Davies has broad experience in the natural resources sector across a number of geographies, commodities and markets. From July 2005 until June 2011, Mr Davies was Chief Executive of Sasol Limited, an international energy, chemical and mining company with operations in 38 countries and listings on the Johannesburg and New York stock exchanges. Mr Davies began his career at Sasol in 1975 and held a number of diverse roles, including managing the group’s oil and gas businesses, before becoming Chief Executive in July 2005. He is a former Director of various Sasol Group companies and joint ventures.

Carlos Cordeiro
AO, BSc (Hons), MA (Econ), 59
Independent Non-executive Director
Member of the Risk and Audit Committee
Member of the Remuneration Committee
Director of BHP Billiton Limited and BHP Billiton Plc since March 2010.
Carlos Cordeiro brings to the Board more than 30 years’ experience in the finance sector. Mr Cordeiro was previously an Executive Director of Schroders Australia Limited and has extensive financial markets, risk management and investment management expertise. Mr Cordeiro is a former Director of BT Investment Management Limited, Westpac Banking Corporation, AMP Limited, AGL Energy Limited, the Australian Gas Light Company, South Australian Water and the Economic Development Board of South Australia.

Other directorships and offices (current):
• Member of Australian Federal Government Financial Systems Inquiry (since January 2014).
• Director of Stockland Group (since March 2009).
• Member of the Advisory Board of Nanosonic Limited (since June 2007).

Carolyn Hewson
AO, BSc (Hons), MA (Econ), 59
Independent Non-executive Director
Member of the Risk and Audit Committee
Member of the Remuneration Committee
Director of BHP Billiton Limited and BHP Billiton Plc since June 2007.
Carolyn Hewson was previously an Executive Director of Schroders Australia Limited and has extensive experience in financial markets, risk management and investment management expertise. Ms Hewson is a former Director of BT Investment Management Limited, Westpac Banking Corporation, AMP Limited, AGL Energy Limited, the Australian Gas Light Company, South Australian Water and the Economic Development Board of South Australia.

Other directorships and offices (current):
• Member of Australian Federal Government Financial Systems Inquiry (since January 2014).
• Director of Stockland Group (since March 2009).
• Member of the Advisory Board of Nanosonic Limited (since June 2007).

Lindsay Maxsted
DePBus (Gordon), FCA, FAICD, 60
Independent Non-executive Director
Chairman of the Risk and Audit Committee
Member of the Finance Committee
Director of BHP Billiton Limited and BHP Billiton Plc since March 2011.
Lindsay Maxsted is a corporate recovery specialist who has managed a number of Australia’s largest corporate insolvencies and restructuring engagements and, until 2011, continued to undertake consultancy work in the restructuring and advisory field. He was the Chief Executive Officer of KPMG Australia between 2001 and 2007. Mr Maxsted is the Board’s nominated ‘audit committee financial expert’ for the purposes of the US Securities and Exchange Commission Rules, and the Board is satisfied that he has recent and relevant financial experience for the purposes of the UK Financial Conduct Authority’s Disclosure and Transparency Rules and the UK Corporate Governance Code.

Other directorships and offices (current):
• Chairman of Westpac Banking Corporation (since December 2011) and a Director (since March 2008).
• Chairman of Transurban Group (since August 2010) and a Director (since March 2008).
• Director and Honorary Treasurer of Baker IDI Heart and Diabetes Institute (since June 2005).
Wayne Murdy
BSc (Business Administration), CPA, 70
Independent Non-executive Director
Member of the Risk and Audit Committee
Member of the Finance Committee
Director of BHP Billiton Limited and BHP Billiton Plc since June 2009.
Wayne Murdy has a background in finance and accounting, where he has gained comprehensive experience in the financial management of mining, oil and gas companies during his career with Getty Oil, Apache Corporation and Newmont Mining Corporation. Mr Murdy served as the Chief Executive Officer of Newmont Mining Corporation from 2001 to 2007 and Chairman from 2002 to 2007. He is also a former Chairman of the International Council on Mining and Metals, a former Director of the US National Mining Association and a former member of the Manufacturing Council of the US Department of Commerce.
Other directorships and offices (current):
• Director of Weyerhaeuser Company (since January 2009).

Keith Rumble
BSc, MSc (Geology), 60
Independent Non-executive Director
Member of the Sustainability Committee
Director of BHP Billiton Limited and BHP Billiton Plc since September 2008.
Keith Rumble was previously Chief Executive Officer of SUN Mining, a wholly owned entity of the SUN Group, a principal investor and private equity fund manager in Russia, India and other emerging and transforming markets. Mr Rumble has more than 30 years’ experience in the resources industry, specifically in titanium and platinum mining, and is a former Chief Executive Officer of Impala Platinum (Pty) Ltd and former Chief Executive Officer of Rio Tinto Iron and Titanium Inc in Canada. He began his career at Richards Bay Minerals in 1980 and held various management positions before becoming Chief Executive Officer in 1996. It is intended that Mr Rumble will become a Non-executive Director of the new company that BHP Billiton plans to form in the proposed demerger. Mr Rumble would retire from the BHP Billiton Board at the time the shareholders vote on this demerger proposal.
Other directorships and offices (current):
• Director of Enzyme Technologies (Pty) Limited (since September 2011).
• Director of Elite Wealth (Pty) Limited (since August 2010).
• Board of Governors of Rhodes University (since April 2005).
• Trustee of the World Wildlife Fund, South Africa (since October 2006).

John Schubert
AO, BCh Eng, PhD (Chem Eng), 71
Independent Non-executive Director
Chairman of the Sustainability Committee
Member of the Remuneration Committee
Member of the Nomination and Governance Committee
Director of BHP Limited since June 2000 and a Director of BHP Billiton Limited and BHP Billiton Plc since June 2001.
John Schubert has considerable experience in the international oil industry, including at Chief Executive Officer level. Dr Schubert has had executive mining and financial responsibilities and was Chief Executive Officer of Pioneer International Limited for six years, where he operated in the building materials industry in 16 countries. Dr Schubert has experience in mergers, acquisitions and divestments, project analysis and management. He was previously Chairman and Managing Director of Esso Australia Limited and President of the Business Council of Australia.
Other directorships and offices (current):
• Chairman of Garvan Institute of Medical Research (since May 2013).
• Chairman of the Great Barrier Reef Foundation (since November 2004).

Baroness Shriti Vadera
MA, 52
Independent Non-executive Director
Member of the Risk and Audit Committee
Director of BHP Billiton Limited and BHP Billiton Plc since January 2011.
Shriti Vadera brings wide-ranging experience in finance, economics and public policy as well as extensive experience of emerging markets and international institutions. In recent years, Baroness Vadera has undertaken a number of international assignments, including advising on the Eurozone crisis and working with the Korean Chair of the G20. Baroness Vadera was a Minister in the British Government from 2007 to 2009 in the Department for International Development, the Business Department and the Cabinet Office, where she was responsible for the response to the global financial crisis. She was on the Council of Economic Advisers, H M Treasury from 1999 to 2007 focusing on business and international economic issues. Prior to her time in the British Government, Baroness Vadera spent 14 years in investment banking at UBS Warburg, where she specialised in advisory work in emerging markets.
Other directorships and offices (current):
• Director of AstraZeneca Plc (since January 2011).

Jane McAloon
BSc (Hons), LLB, GDipGov, FCIS, 50
President, Governance and Group Company Secretary
Chairman of the Disclosure Committee
Our BHP Billiton Charter is core to the governance framework of BHP Billiton. It embodies our corporate purpose, strategy and values, and defines when we are successful. We foster a culture that values and rewards high ethical standards, personal and corporate integrity and respect for others.

We live the values of Our Charter and adhere to the standards of conduct required by our BHP Billiton Code of Business Conduct. We are focused on enhancing the diversity of perspective on the Board. We do this in a structured manner, looking out over a five-year period at the skills, backgrounds, knowledge, experience and diversity on the Board. The right blend of skills, experience and perspective is critical to ensuring the Board oversees BHP Billiton effectively for shareholders. As a result of this process, and as described in last year’s Annual Report, we have been seeking additional upstream oil, gas and shale experience.

We are therefore pleased that Malcolm Brinded joined the Board as a Non-executive Director and member of the Sustainability Committee in April 2014. Mr Brinded served on the Board of Royal Dutch Shell plc between 2002 and 2012. During his 37-year career with Shell, he held leadership roles, including Executive Director of Exploration and Production, Executive Director of Upstream International and UK Country Chair and Managing Director. His appointment reflects the structured and rigorous approach to the Company’s Board succession and planning.

As part of our corporate planning cycle, we have embedded a range of scenarios that are reviewed annually and updated by the Group with the GMC’s involvement. The scenarios, and the governance process supporting them, also form part of the Board’s agenda.

These scenarios provide a lens to assess the performance of our business portfolio. They include assumptions around carbon and commodity prices, currencies, costs and tax rates, and ranges for a number of risks that face the Group, including climate change, global growth, levels of trade, geopolitical situation and technology focus. All of the scenarios are used to inform BHP Billiton’s strategy and the resilience of our diversified asset portfolio over the short and long term.

Regardless of which direction the world may take, we will always be guided by Our Charter values, including our value of Sustainability, in how we operate our business, interact with our stakeholders and plan for the future.

As we set out in section 3 of the Annual Report, while the five committees have accountability for making recommendations to the Board on certain matters, such as remuneration and sustainability, we ensure all Board members have oversight and the opportunity for full discussion of those issues through the committee report-out process to the full Board.

Our BHP Billiton Charter is core to the governance framework as a result of this process, and as described in last year’s Annual Report, we have been seeking additional upstream oil, gas and shale experience.

As we set out in section 3 of the Annual Report, while the five committees have accountability for making recommendations to the Board on certain matters, such as remuneration and sustainability, we ensure all Board members have oversight and the opportunity for full discussion of those issues through the committee report-out process to the full Board.
Corporate Governance Summary continued

As part of our ongoing renewal of the Board, we announced in August that David Crawford will be retiring from the Board after the forthcoming Annual General Meetings. Mr Crawford has been appointed Chairman-designate of the new company that BHP Billiton plans to form in a demerger. On behalf of all shareholders, I would like to thank him for his exceptional service to the Board and the Group over many years, and wish him all the best for the future. It is also intended that Keith Rumble will become a Non-executive Director of the demerged company, and that he will retire from the BHP Billiton Board at or around the time the demerger is completed (currently scheduled for mid-2015).

In relation to gender diversity, the Board has set a goal of increasing the number of women on the Board to at least three. This remains our target, which we aim to achieve by the end of 2015.

Continuous improvement
The Board has a commitment to ongoing improvement in the way we carry out our work. This year, we conducted an externally facilitated review of the Board, and a range of improvements to the Board’s work and effectiveness had been agreed.

I hope you find this description of our corporate governance useful and I look forward to receiving any feedback that fellow shareholders may have.

Jac Nasser AO
Chairman

Evaluations conducted in FY2014
During the year under review, the Board conducted an externally facilitated Board assessment, an internal assessment of each Director and an internal committee review to ensure continued compliance with the recently updated committee terms of reference.

Board assessment
The external assessment focused in particular on the Board’s interface with the CEO and senior management; the Board’s priorities; and the focus of the Board committees and their interface with the Board. It also sought the views of the Directors for suggestions for improving the Board’s overall effectiveness. The review was facilitated by JCA Group, and involved an interview with each Director. The findings were discussed in depth by the Board. A range of improvements to the Board’s work and effectiveness will be incorporated into the work of the Board and procedures.

Director assessment
Due to the previous year’s externally facilitated Board assessment, the FY2014 Director assessment was internally facilitated. The overall findings were presented to the Board and discussed. Each Director was provided feedback on their contribution to the Board and its committees. This review supported the Board’s decision to endorse all retiring Directors standing for re-election.

Committee review
During FY2014, an internal review was conducted to confirm continued compliance with each committee’s respective terms of reference, which were updated in FY2013. During the previous year, we conducted external assessments of the committees, which utilised an electronic survey tool provided by Lintstock and were focused to draw out views on work, overall effectiveness, decision-making and other processes. Outcomes and recommendations from each committee were considered and approved by the Board prior to implementation.

Risk management governance structure
We believe the identification and management of risk is central to achieving the corporate purpose of creating long-term shareholder value. The principal aim of the Group’s risk management governance structure and internal control systems is to identify, evaluate and manage business risks, with a view to enhancing the value of shareholders’ investments and safeguarding assets.

Each year, the Board reviews and considers the Group’s risk profile, which covers both operational and strategic risks. The risk profile is assessed to ensure it supports the achievement of the Group’s strategy, while maintaining a solid ‘A’ credit rating. The Board’s approach to investment decision-making and portfolio management, and the consideration of risk in that process, is set out in sections 1.7 and 1.5.4 of the Annual Report, and includes a broad range of scenarios to assess our portfolio. This process allows us to be able to continually adjust the shape of our portfolio to match energy and commodity demand and meet society’s expectations, while maximising shareholder returns.

Director skills, experience and attributes required
The Board considers a diversity of skills, backgrounds, knowledge, experience, geographic location, nationalities and gender is required in order to effectively govern the business. The Board and the Nomination and Governance Committee work to ensure that the Board continues to have the right balance of skills, experience, independence and Group knowledge necessary to discharge its responsibilities in accordance with the highest standards of governance.

In order to govern the Group effectively, Non-executive Directors must have a clear understanding of the Group’s overall strategy, together with knowledge about the Group and the industries in which it operates. Non-executive Directors must be sufficiently familiar with the Group’s core business to be effective contributors to the development of strategy and to monitor performance. Part of the required understanding of strategy and the core business is the requirement to understand the risks that the Company faces and the processes in place to mitigate and manage those risks. We operate in an uncertain external environment, and the Group is exposed to many material risks across its operations, including some that are systemic, such as financial risks and climate change. All those risks are factored into the Board’s approach to strategy and its assessment of an optimised portfolio. The Executive Director brings additional perspectives to the Board’s work through a deep understanding of the Group’s business. The key skills collectively demonstrated on the Board are:

Remuneration Summary

Dear Shareholder

Our Remuneration Committee recognises that remuneration has an important role to play in supporting the implementation and achievement of the Group’s strategy and our ongoing performance, aligning the activities of management to the interests of shareholders, and in supporting Our BHP Billiton Charter. The remuneration policy is reviewed annually and, where appropriate, fine-tuned to ensure that it continues to be effective in achieving these goals.

The key principles of our remuneration policy, which remain unchanged, are to:

- support the execution of the Group’s business strategy in accordance with a risk framework that is appropriate for the organisation;
- provide competitive rewards to attract, motivate and retain highly skilled executives willing to work around the world;
- apply demanding performance measures, including key financial and non-financial measures of performance;
- link a significant component of pay to our performance and the creation of value for our shareholders from relative outperformance;
- ensure remuneration arrangements are equitable and facilitate the deployment of people around the Group;
- limit severance payments on termination to pre-established contractual arrangements (which do not commit us to making any unjustified payments).

Link to strategy

Our Charter sets out our purpose, strategy, values and how we measure our success. In framing how we remunerate our executives we are guided by the measures of success contained in Our Charter. They are designed to ensure that executives take a long-term approach to decision-making and to minimise activities that focus only on short-term results at the expense of longer-term business growth and success. The Committee has considered the ways in which risk management and the long-term horizon are reflected throughout BHP Billiton’s remuneration arrangements for all executives, and is satisfied that our approach reinforces the desired behaviours.

This is largely achieved through the Group’s approach to short-term and long-term incentive awards, which comprise a significant portion of total remuneration for our Chief Executive Officer (CEO) Andrew Mackenzie and other members of the Group Management Committee (GMC). The equity component of the short-term incentive award is deferred for a two-year period, and performance under the long-term incentive plan (LTIP) is measured over a five-year period. The actual rewards received by Mr Mackenzie and other members of the GMC therefore reflect the Group’s performance and share price over an extended period.

Our approach

There have been no substantial changes to our underlying approach – we ensure that remuneration outcomes reflect the performance of the Group, Businesses and individuals. This approach has enjoyed a strong level of support from shareholders, with a vote in favour for the remuneration report of 97 per cent at last year’s Annual General Meetings.

Our approach to incentive structures has been in place for more than a decade and has served both shareholders and participants well, delivering remuneration outcomes to executives aligned to the performance of the Group and of individuals. BHP Billiton adopted the deferral of a substantial portion of short-term incentive awards in equity in 2003, and a five-year term for long-term incentive awards in 2004. These approaches, which were then market leading, have since become more prevalent and acknowledged as best practice.

Notwithstanding our stable approach, the Committee and the Board continue to pay close attention to shareholders’ views so they can be factored into the Group’s future approach.

Our remuneration policy in action

Each year, the Committee makes decisions regarding a range of remuneration matters, including any changes in base salary, fees and benefits, and adjudicating on short-term and long-term incentive outcomes relating to Mr Mackenzie and other members of the GMC.

Last year, when Mr Mackenzie was appointed to the CEO role, the Board and Committee believed that some downward rebasing of his remuneration package, relative to that of the former CEO, was appropriate; a view supported by Mr Mackenzie.

This year, following the Committee’s annual review process, the FY2015 base salary of Mr Mackenzie has not been increased. Likewise, other elements of Mr Mackenzie’s total target remuneration (pension contributions, benefits and short-term and long-term incentive targets) will remain the same in FY2015 as in FY2014.

Consistent with the approach for Mr Mackenzie, the base salaries and total target remuneration packages for other GMC members have also been held constant for FY2015. Aligned with this, Non-executive Director fees were again frozen, for the third consecutive year.

Mr Mackenzie’s annual short-term incentive is at risk. The scorecard against which his performance is assessed is made up of a number of performance measures, including health, safety, environment and community (HSEC), financial performance, capital project management and individual personal measures. For FY2014, the Committee has assessed the performance of Mr Mackenzie and concluded it was in excess of target with a bonus outcome of 115.3 per cent, against a target of 100 per cent, a maximum of 150 per cent and a minimum of zero. This outperformance was mainly due to positive outcomes across a range of HSEC measures, together with above-target production and productivity achievements.

Mr Mackenzie’s long-term incentive is also at risk. BHP Billiton’s business is long term, and decisions are made that are likely to have an impact for many years. It is therefore important that a significant part of senior executives’ pay reflects long-term performance. BHP Billiton’s LTIP measures performance over five years.
Remuneration Summary continued

The Committee has now considered performance and vesting outcomes for the long-term incentive award granted in 2009, covering the five years to 30 June 2014. The performance condition benchmarked BHP Billiton’s Total Shareholder Return (TSR) against the TSR of a tailored comparator group of resource companies. The five-year TSR performance for BHP Billiton was 60.6 per cent, exceeding the weighted average TSR of the comparator group by 17.8 per cent, resulting in a 58 per cent vesting.

The Committee considered whether there were any circumstances that merited it exercising its discretion to reduce this vesting outcome (as was the case last year where the Committee reduced vesting from 100 per cent to 65 per cent). This discretion is an important safeguard in circumstances where the Committee does not believe that the vesting outcome truly reflects performance.

After carefully considering the relative TSR outcome and both Group and individual performance over the vesting period, the Committee determined that the TSR outcome was a fair reflection of performance.

The total remuneration earned by Mr Mackenzie in FY2014 is set out below. As Mr Mackenzie assumed the role of CEO and Executive Director in May 2013, the FY2013 figures therefore relate only to a part-year period.

Summary

Our fundamental philosophies and approaches to remuneration have not changed – we trust that you will agree that our long held, consistent approach to aligning remuneration to performance has served shareholders well.

John Buchanan
Chairman, Remuneration Committee
11 September 2014
Shareholder information

Annual General Meetings
BHP Billiton Plc
Thursday 23 October 2014 at 11.00am (local time)
The Queen Elizabeth II Conference Centre
Broad Sanctuary, Westminster
London, SW1P 3EE, United Kingdom.

BHP Billiton Limited
Thursday 20 November 2014 at 10.00am (local time)
Adelaide Entertainment Centre
Corner Port Road and Adam Street
Hindmarsh, South Australia, Australia.

Change of shareholder details and enquiries
Shareholders may contact the appropriate office of the BHP Billiton Share Registrar or Transfer Office on any matter relating to their shares or American Depositary Receipt holdings.

Dividend policy and payments
We have a progressive dividend policy that seeks to steadily increase or at least maintain the dividend in US dollars at each half-yearly payment.

We declare our dividends and other distributions in US dollars as it is our main functional currency. BHP Billiton Limited pays its dividends in Australian dollars, UK pounds sterling, New Zealand dollars or US dollars, depending on the country of residence of the shareholder. BHP Billiton Plc pays its dividends in UK pounds sterling to shareholders registered on its principal register in the United Kingdom and in South African rand to shareholders registered on its branch register in South Africa. If shareholders on the United Kingdom register wish to receive dividends in US dollars, they must complete the appropriate election form and return it to the BHP Billiton Share Registrar in the United Kingdom no later than close of business on the Dividend Record Date.

BHP Billiton Limited shareholders may have their cash dividends paid directly into a nominated bank, building society or credit union, depending on the shareholder’s country of residence as shown below.

</tr>
</tbody>
</table>

Shareholders from the above mentioned locations who do not provide their direct credit details and shareholders with registered addresses outside Australia, the United Kingdom, New Zealand and the United States will receive dividend payments by way of a cheque in Australian dollars.

BHP Billiton Plc shareholders may have their cash dividends paid directly into a bank or building society by completing a dividend mandate form, which is available from the BHP Billiton Share Registrar in the United Kingdom or South Africa.

Stock exchange listings
BHP Billiton Limited has a primary listing on the Australian Securities Exchange (ASX) in Australia and BHP Billiton Plc has a premium listing on the UK Listing Authority’s Official List and its ordinary shares are admitted to trading on the London Stock Exchange (LSE). BHP Billiton Plc also has a secondary listing on the Johannesburg Stock Exchange (JSE) in South Africa.

In addition, BHP Billiton Limited and BHP Billiton Plc are listed on the New York Stock Exchange (NYSE) in the United States. Trading on the NYSE is via American Depositary Shares.

(a) For more information on earnings per share refer to note 8 ‘Earnings per share’ to the Financial Statements.
(b) Net operating cash flows are after net interest and taxation. On 1 July 2010, the Group adopted the policy of classifying exploration cash flows which are not recognised as assets as Net operating cash flows. Previously such cash flows were classified as Net investing cash flows. The change in policy arose from amendments to IAS7/IAS12 ‘Cash Flows’. Comparative figures have been restated.
(c) Underlying attributable profit, Underlying EBIT and Underlying EBITDA are used to reflect the underlying performance of BHP Billiton. Underlying attributable profit is attributable profit excluding any exceptional items. Underlying EBIT is earnings before net finance costs, taxation and any exceptional items. Underlying EBITDA is Underlying EBIT before depreciation, impairments and amortisation. We believe that Underlying attributable profit, Underlying EBIT and Underlying EBITDA provide useful information, but should not be considered as an indication of, or as an alternative to, Attributable profit as an indicator of actual operating performance or as an alternative to cash flow as a measure of liquidity. Underlying EBIT and Underlying EBITDA are included in the FY2014 Consolidated Financial Statements as required by IFRS 8 ‘Operating Segments’.
(d) Represents the share of capital and exploration expenditure attributable to BHP Billiton shareholders on a cash basis. Includes BHP Billiton proportionate share of equity accounted investments; excludes capitalised deferred stripping and non-controlling interests. FY2011 and FY2010 data has not been restated and represents the capital and exploration expenditure of the Group on a cash basis, as published.
(e) FY2011 and FY2010 data has not been restated for the effects of new accounting standards and interpretations and for the effects of other voluntary changes in accounting policy which are effective in the financial year commencing from 1 July 2013.
